### West's Federal Practice Digest 4th LexisNexis

Considers legislation to prescribe policy and procedure in connection with construction contracts made by executive agencies.

*Decisions and Orders of the National Labor Relations Board* Heinemann

In order to succeed in a construction business you have to be able to mark up the price of your jobs to cover overhead expenses and make a decent profit. The problem is how much to mark it up. You don't want to lose jobs because you charge too much, and you don't want to work for free because you've charged too little. If you know how much to mark up you can apply it to your job costs and arrive at the right sales price for your work. This book gives you the background and the calculations necessary to easily figure the markup that is right for your business. Includes a CD-ROM with forms and checklists for your use.

### Markup & Profit Craftsman Book Co

This fifth edition reference on contract law by Murray (law, Duquesne U.) has been updated to reflect the changes in the ever evolving field. The author provides comprehensive treatments on a variety of related elements, including: the agreement and validation processes, the frauds statute, abuse of bargain and illegality, risk allocation, remedies for breach of contract, contract beneficiaries, assignment of rights and delegation of duties, and more. The book will interest students in related

fields as well as contract law practitioners. Annotation ©2012 Book News, Inc., Portland, OR (booknews.com).

### New York Review of the Telegraph and Telephone and Electrical Journal
