ROWAN MILLS

Kürschners Deutscher Literatur-Kalender - Nekrolog Springer

An ambitious and unflinching tale of colonialism, conquest, and revenge, *Queen of the Conquered* begins a powerful fantasy series set in a Caribbean-inspired world. *Named one of TIME's Top 100 Fantasy Books Of All Time * World Fantasy Award for Best Novel, winner On the islands of Hans Lollik, Sigourney Rose was the only survivor when her family was massacred by the colonizers. When the childless king of the islands declares he will choose his successor from amongst eligible noble families, Sigourney is ready to exact her revenge. But someone is killing off the ruling families to clear a path to the throne. And as the bodies pile up and all eyes regard her with suspicion, Sigourney must find allies among her prey and the murderer among her peers... lest she become the next victim. Praise for *Queen of the Conquered*: "A storm of a novel as epic as Alexandre Dumas's *The Count of Monte Cristo*." —Tochi Onyebuchi, author of *Beasts Made of Night* "The book's absorbing setting, captivating lead, and relevant themes of race and class complement each other with alternating delicacy and savagery." —NPR Books "Callender's first adult novel draws race relations, conquest, magic, and politics into an imaginative, layered story that will keep readers twisting until the end." —Library Journal *Islands of Blood and Storm* *Queen of the Conquered* King of the Rising

About the Publisher *Forgotten Books* publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. *Forgotten Books* uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

Irregular Serials and Annuals Walter de Gruyter GmbH & Co KG

This book describes the most commonly methods used for the study of the internal anatomy of teeth and provides a complete review of the literature concerning the current state of research employing contemporary imaging tools such as micro-CT and CBCT, which offer greater accuracy whether using qualitative or quantitative approaches. In order to facilitate the management of complex anatomic anomalies, specific clinical protocols and valuable practical tips are suggested. In addition, supplementary material consisting in high-quality videos and images of different anatomies obtained using micro-CT technology is made available to the reader. The book was planned and developed in collaboration with an international team comprising world-recognized researchers and experienced clinicians with expertise in the field. It will provide the readers with a thorough

understanding of canal morphology and its variations in all groups of teeth, which is a basic prerequisite for the success of endodontic therapy.

Beton-Kalender 2019 - Schwerpunkte Walter de Gruyter GmbH & Co KG

From Jane Austen to contemporary fanfiction and adaptations, literary portrayals of the child and imaginings of childhood are particularly telling indicators of cultural values and when they shift. Inspired by the responsive reading practices of L.M. Montgomery herself, those demonstrated by her characters, and those of her diverse readership, *Children and Childhoods* in L.M. Montgomery works with concepts of confluence, based on organic, non-linear readings of texts across time and space. Such readings reconsider views of childhood and children by challenging power hierarchies and inequities found in approaches that privilege more linear readings of literary influence. While acknowledging differences between childhood and adulthood, contributors emphasize kinship between child and adult as well as between past and present selves and use both scholarly approaches and creative reimagining to explore how the boundaries between different stages of life are blurred in Montgomery's writing. *Children and Childhoods* in L.M. Montgomery addresses Montgomery's challenges to prescribed assumptions about childhood while positioning her novels as essential texts in twenty-first-century literary, childhood, and youth studies. Contributors include Yoshiko Akamatsu (Notre Dame Seishin University), Balaka Basu (UNC Charlotte), Rita Bode (Trent University), Holly Cinnamon, Lesley D. Clement, Vappu Kannas, Heidi Lawrence (University of Glasgow), Kit Pearson, Rosalee Peppard Lockyer, E. Holly Pike, Laura Robinson (Acadia University), Kate Scarth (UPEI), Margaret Steffler (Trent University), William Thompson (MacEwan University), Bonnie Tulloch (UBC), Asa Warnqvist (Swedish Institute for Children's Books)

Queen of the Conquered CRC Press

Principles of Translational Science in Medicine: From Bench to Bedside, Third Edition, provides an update on major achievements in the translation of research into medically relevant results and therapeutics. The book presents a thorough discussion of biomarkers, early human trials, and networking models, and includes institutional and industrial support systems. It also covers algorithms that have influenced all major areas of biomedical research in recent years, resulting in an increasing number of new chemical/biological entities (NCEs or NBEs) as shown in FDA statistics. New chapters include: Translation in Oncology, Biologicals, and Orphan Drugs. The book is ideal for use as a guide for biomedical scientists to establish a systematic approach to translational medicine and is written by worldwide experts in their respective fields. Includes state-of-the-art principles, tools such as biomarkers and early clinical trials, algorithms of translational science in medicine Provides in-depth description of special translational aspects in the currently most successful areas of clinical translation, namely oncology and immunology Covers status of institutionalization of translational medicine, networking structures and outcomes at the level of marketing authorization

The Little Drummer Boy Geiger

Der neue Beton-Kalender 2019 mit den Schwerpunkten Parkbauten sowie Geotechnik und EC 7 bietet eine solide Arbeitsgrundlage und ein topaktuelles und verlässliches Nachschlagewerk für die fehlerfreie Planung dauerhafter Betonkonstruktionen. Zahlreiche Parkhäuser und Tiefgaragen werden im Rahmen des Ausbaus der Verkehrsinfrastruktur und im innerstädtischen Bauen errichtet. Hierbei sind viele Besonderheiten in Bezug auf Funktionalität und Dauerhaftigkeit zu beachten, die gerade in der Planung ein hohes Maß an speziellem Wissen erfordern. Die relevanten Regelwerke für Deutschland, Österreich und die Schweiz werden in dieser Ausgabe vorgestellt und erläutert. Vertiefende Beiträge behandeln die Instandsetzung von Tiefgaragen und Parkhäusern, den chemischen Angriff auf Beton und den kathodischen Korrosionsschutz. Die Abdichtungen bei unterirdischen Bauwerken werden in einem aktualisierten Beitrag gesondert behandelt. Für Entwurf, Berechnung und Bemessung in der Geotechnik werden Erläuterungen und Hintergründe zum Eurocode 7 auf aktuellem Stand gegeben. Flachgründungen und Pfahlgründungen werden dabei mit zahlreichen Beispielen behandelt. Außerdem ist zur Vervollständigung neben den Gründungen an Land ein umfassendes Kapitel den marinen Gründungsbauwerken gewidmet. In bewährter Weise wird die Eurocode-Kommentierung in Kurzfassungen für einfache Anwendungsfälle und die schnelle Orientierung fortgeführt: passend zum Schwerpunkt ist DIN EN 1997 Teil 1 "Entwurf, Berechnung und Bemessung in der Geotechnik" (Eurocode 7) mit den zugehörigen Nationalen Anwendungsdokumenten in konsolidierter Form und auf aktuellem Stand in dieser Ausgabe enthalten. Die Innovationskraft der Betonbauweise muss sich auch bei der Gewichtsminimierung von tragenden Betonbauteilen beweisen. Hierzu wird die Technologie des Gradientenbetons vorgestellt. Dieser Ansatz basiert auf der bewussten Gestaltung des Bauteilinnern mit dem Ziel einer Homogenisierung der Spannungsfelder und damit verbunden einer signifikanten Masseneinsparung unter der Berücksichtigung einer rezyklierfähigen Bauweise. Der Beton-Kalender 2019 ist wiederum eine besondere Fundgrube für Ingenieure in Planungsbüros und in der Bauindustrie.

Kürschners Deutscher Literatur-Kalender. 59. Jahrgang 1984 Walter de Gruyter GmbH & Co KG

Das Thema Nachhaltigkeit, der bewusste und schonende Umgang mit Ressourcen bei Neubau und dem Bauen im Bestand werden im Beton-Kalender 2021 unter dem besonderen Blickwinkel des Bauens mit Fertigteilen und des Ertüchtigens beleuchtet. Neben aktualisierten Beiträgen zur Lebensdauerbemessung, den Grundlagen zum Bauen mit Betonfertigteilen im Hochbau und der Holz-Beton-Verbundbauweise wird speziell auf die Ressourceneffizienz beim Bau mit Betonfertigteilen eingegangen. Hierbei geht es um innovative Ansätze für Entwurf, Fügeverfahren und Herstellungstechnologien (einschl. Automatisierung). In diesem Zusammenhang ist auch die Elementbauweise mit Gitterträgern zu nennen, welche ihrerseits die Vorteile der Vorfertigung mit der Flexibilität der Ort betonbauweise vereint. Zum Thema Nachhaltigkeit gehört auch der schonende Umgang mit Bestandsbauwerken. Im Beton-Kalender wird hierzu die Verstärkung von Betonbauteilen mit geklebter Bewehrung und mit Schraubverbindungen aufgegriffen. Neben einem aktualisierten Beitrag zu geklebten Verstärkungen mit CFK-Lamellen und Stahllaschen mit Erläuterungen und Beispielen wird die DAfStb-Richtlinie "Verstärken von Betonbauteilen mit geklebter Bewehrung" abgedruckt. Unter dem Schwerpunkt "Integrale Bauwerke" fasst der Beton-Kalender den aktuellen Stand des Wissens für diese Bauweise für Brücken und Tragwerke im Hochbau zusammen. Eine Reihe von Beiträgen widmet sich neuartigen Betonen und deren Einsatzmöglichkeiten im Hinblick auf Neubau und Ertüchtigung, wie z.B. dem UHPC, Stahlfaserbeton und dem Infralichtbeton.

Kürschners Deutscher Literatur-Kalender. 56. Jahrgang Walter de Gruyter GmbH & Co KG

"The funniest photographs of wildlife from around the world collected here in one ... book [intended] for animal lovers of all stripes"--

Farmers' Almanac 2008 Bentham Science Publishers

Medical and Veterinary Entomology, Second Edition, has been fully updated and revised to provide the latest information on developments in entomology relating to public health and veterinary importance. Each chapter is structured with the student in mind, organized by the major headings of Taxonomy, Morphology, Life History, Behavior and Ecology, Public Health and Veterinary Importance, and Prevention and Control. This second edition includes separate chapters devoted to each of the taxonomic groups of insects and arachnids of medical or veterinary concern, including spiders, scorpions, mites, and ticks. Internationally recognized editors Mullen and Durden include extensive coverage of both medical and veterinary entomological importance. This book is designed for teaching and research faculty in medical and veterinary schools that provide a course in vector borne diseases and medical entomology; parasitologists, entomologists, and government scientists responsible for oversight and monitoring of insect vector borne diseases; and medical and veterinary school libraries and libraries at institutions with strong programs in entomology. Follows in the tradition of *Herm's Medical and Veterinary Entomology* The latest information on developments in entomology relating to public health and veterinary importance Two separate indexes for enhanced searchability: Taxonomic and Subject New to this edition: Three new chapters Morphological Adaptations of Parasitic Arthropods Forensic Entomology Molecular Tools in Medical and Veterinary Entomology 1700 word glossary Appendix of Arthropod-Related Viruses of Medical-Veterinary Importance Numerous new full-color images, illustrations and maps throughout

Payne's illustrierter familien-kalender ... Ten Speed Press

In *Hector Fox and the Giant Quest*, the first book of the Hector Fox series, Hector Fox and his charming band of woodland friends--Mo Marten, Charlie Chipmunk, Jeremiah Rabbit, and Lucy Skunk--head out on an adventure looking to find a real giant. After all, there was a rumor that an enormous, shadowy stranger was living in the Forbidden Marsh beyond the forest. The friends journey is filled with twists and turns, including a capsized boat, as they roam far from home until they make a surprising-- and giant discovery!

Kürschners Deutscher Literatur-Kalender. 58. Jahrgang 1981 Islandport Press

On the heels of his hugely successful *Red Hot* exhibition in London (successfully funded through Kickstarter), photographer and filmmaker Thomas Knights creates the ultimate bible for fans of hot ginger men. With a truly international feel, the book contains one hundred flame haired guys from all over the world, captured topless against the iconic vivid blue background now synonymous with the *Red Hot* brand. Not only is it pleasing to the eye, the book also holds a mirror up to current perceptions of male beauty. Now in a new format.

Community/Public Health Nursing Oxford University Press

This classic Christmas story about a shy boy who plays his trusted drum for the newborn king will charm children and parents alike. A brand new story from Bernadette Watts, never before published.

Kürschners Deutscher Musiker-Kalender 1954 Frontiers Media SA

World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Bauphysik Kalender 2019 Academic Press

Provides weather predictions for the entire United States and includes such features as the best days for fishing, recipes from the Wild West, and tips for tightwads.

Kürschners Deutscher Gelehrten-Kalender 1954. Lexikon der lebenden deutschsprachigen Wissenschaftler John Wiley & Sons

Pediatric Anesthesia: A Guide for the Non-Pediatric Anesthesia is a comprehensive, contemporary reference that addresses all aspects of pediatric anesthesia. Both students and medical practitioners - novice and experienced - will find invaluable educational and practical information in this book. The book covers the subject in two parts. Part I covers basic information about pediatric and neonatal anatomy and physiology, pharmacology, emergency room and operating room procedures and surgery. Chapters on general anesthetic procedures in emergency rooms, operational theatres and common surgeries. Part II covers advanced topics for practicing healthcare professionals which include anesthesia for patients with a range of common and uncommon comorbidities, considerations for critically-ill patients, genetic disorders, pain management, COVID-19 guidelines for anesthesia, patient safety and research. Key features: - Basic and advanced information about pediatric and neonatal anesthesia covered in 25 chapters over two parts - Simple and organized presentation for learners - Contributions by expert clinicians and researchers - Special topics included such as considerations for patients with comorbidities and genetic disorders - References for further reading - Detailed illustrations and tables The text is an essential reference for scholars and professionals affiliated with general anesthesiology and surgery specialties at all levels who want to understand anesthesia for pediatric patients.

Geologen-Kalender Academic Press

The Maudsley® Prescribing Guidelines in Psychiatry The new edition of the world-renowned reference guide on the use of medications for patients presenting with mental health problems The Maudsley Prescribing Guidelines in Psychiatry is the essential evidence-based handbook on the safe and effective prescribing of psychotropic agents. Covering both common and complex prescribing situations encountered in day-to-day clinical practice, this comprehensive resource provides expert guidance on drug choice, minimum and maximum doses, adverse effects, switching medications, prescribing for special patient groups, and more. Each clear and concise chapter includes an up-to-date reference list providing easy access to the evidence on which the guidance is based. The fourteenth edition has been fully updated to incorporate the latest available research, the most recent psychotropic drug introductions, and all psychotropic drugs currently used in the UK, USA, Canada, Australia, New Zealand, and Japan. Several new sections cover topics such as deprescribing of major psychiatric drugs, prescribing psychotropics at the end of life, the treatment of agitated delirium, the genetics of clozapine prescribing, the use of weekly penfluridol, and the treatment of psychotropic withdrawal. Featuring contributions by an experienced team of psychiatrists and specialist pharmacists, the new edition of The Maudsley Prescribing Guidelines in Psychiatry: Provides succinct coverage of drug treatment of psychiatric conditions and formulating prescribing policy in mental health Covers a wide range of psychiatric conditions including schizophrenia, bipolar disorder, depression and anxiety, borderline personality, eating disorders, and many others Provides advice on prescribing for children and adolescents, older people, pregnant women, and other special patient groups Offers new sections on genetic prescribing, long-acting injectable formulations, ketamine administration and uses, and dopamine super-sensitivity Includes referenced information on off-label prescribing, potential interactions with other substances such as alcohol, tobacco, and caffeine, and treating patients with comorbid physical conditions Whether in the doctor's office, in the clinic, or on the ward, The Maudsley Prescribing Guidelines in Psychiatry, Fourteenth Edition is a must-have for psychiatrists, pharmacists, neuropharmacologists, clinical psychologists, nurses, and other healthcare professionals working in mental health, as well as trainees and students in medicine, pharmacy, and nursing.

Wild and Crazy John Wiley & Sons

Understanding deserts and drylands is essential, as arid landscapes cover >40% of the Earth and are home to two billion people. Today's problematic environment-human interaction needs contemporary knowledge to address dryland complexity. Physical dimensions in arid zones—land systems, climate and hazards, ecology—are linked with social processes that directly impact drylands, such as land management, livelihoods, and development. The challenges require integrated research that identifies systemic drivers across global arid regions. Measurement and monitoring, field investigation, remote sensing, and data analysis are effective tools to investigate natural dynamics. Equally, inquiry into how policy and practice affect landscape sustainability is key to mitigating detrimental activity in deserts. Relations between socio-economic forces and degradation, agro-pastoral rangeland use, drought and disaster and resource extraction reflect land interactions. Contemporary themes of food security, conflict, and conservation are interlinked in arid environments. This book unifies desert science, arid environments, and dryland development. The chapters identify land dynamics, address system risks and delineate human functions through original research in arid zones. Mixed methodologies highlight the vital links between social and environmental science in global deserts. The book engages with today's topical themes and presents novel analyses of arid land systems and societies.

Kürschners Deutscher Literatur-Kalender. 54. Jahrgang Saunders

Der Stahlbau-Kalender dokumentiert verlässlich und aus erster Hand den aktuellen Stand der Stahlbau-Regelwerke. Seit der Ausgabe 2011 werden systematisch alle Teile von Eurocode 3 mit ihren Nationalen Anhängen kommentiert. In dieser Ausgabe werden neben der Aktualisierung von Teil 1-1 "Allgemeine Bemessungsregeln und Regeln für den Hochbau" auch Erläuterungen für die neuen Regeln der zukünftigen Eurocode-Generation präsentiert. Außerdem wird für den Metalleichtbau auf die sich abzeichnenden Änderungen und Ergänzungen in Eurocode 3 Teil 1-3 für kaltgeformte Bauteile und Bleche und in Eurocode 9 Teil 1-4 eingegangen. Der Stahlbau ist in grundlegender Weise mit dem Leichtbau und der Anwendung von faserverstärkten Kunststoffen verbunden. Die funktionalen und wirtschaftlichen Vorteile, wie z. B. geringes Eigengewicht, hohe mechanische Festigkeit, einfache Montage, niedrige thermische Leitfähigkeit und vielfältige architektonische Gestaltungsmöglichkeiten, werden für Sandwichelemente, im Membranbau, für temporäre und für fliegende Bauten bis hin zu Leichtbaubrücken genutzt. Zu diesen Themen enthält das Buch Beiträge über die ingenieurmäßige Auslegung von Bauteilen mit Erläuterungen zu den Konstruktionsregeln. Bei Leichtbau-Konstruktionen gilt es, ein besonderes Augenmerk auf das Schwingungsverhalten zu legen. Dieses wird in zwei Beiträgen, neben der Erdbebenbemessung, besonders vertieft. Ein weiteres grundlegendes Thema des Stahlbaus - der Korrosionsschutz - wird in zwei ausführlichen Beiträgen mit allen Aspekten und Möglichkeiten umfassend und aktuell behandelt. Das Buch ist ein Wegweiser für die richtige Berechnung und Konstruktion im gesamten Stahlbau mit neuen Themen in jeder Ausgabe. Es stellt anwendungsbereites Wissen mit zahlreichen Beispielen zur Verfügung. Herausragende Autoren aus der Industrie, aus Ingenieurbüros und aus der Forschung vermitteln Grundlagen und geben praktische Hinweise.

The Oxford Handbook of Music and the Brain Bruno Gmuender

"A delightful, compelling book that offers a dazzling array of practical, thoughtful exercises designed to spark creativity, help solve problems, foster connection, and make our lives better."—Gretchen Rubin, New York Times bestselling author and host of the Happier podcast In an era of ambiguous, messy problems—as well as extraordinary opportunities for positive change—it's vital to have both an inquisitive mind and the ability to act with intention. Creative Acts for Curious People is filled with ways to build those skills with resilience, care, and confidence. At Stanford University's world-renowned Hasso Plattner Institute of Design, aka "the d.school," students and faculty, experts and seekers bring together diverse perspectives to tackle ambitious projects; this book contains the experiences designed to help them do it. A provocative and highly visual companion, it's a definitive resource for people who aim to draw on their curiosity and creativity in the face of uncertainty. Teeming with ideas about discovery, learning, and leading the way through unknown creative territory, Creative Acts for Curious People includes memorable stories and more than eighty innovative exercises. Curated by executive director Sarah Stein Greenberg, after being honed in the classrooms of the d.school, these exercises originated in some of the world's most inventive and unconventional minds, including those of d.school and IDEO founder David M. Kelley, ReadyMade magazine founder Grace Hawthorne, innovative choreographer Aleta Hayes, Google chief innovation evangelist Frederik G. Pferdt, and many more. To bring fresh approaches to any challenge—world changing or close to home—you can draw on exercises such as Expert Eyes to hone observation skills, How to Talk to Strangers to foster understanding, and Designing Tools for Teams to build creative leadership. The activities are at once lighthearted, surprising, tough, and impactful—and reveal how the hidden dynamics of design can drive more vibrant ways of making, feeling, exploring, experimenting, and collaborating at work and in life. This book will help you develop the behaviors and deepen the mindsets that can turn your curiosity into ideas, and your ideas into action.
