This book consists of a series of papers that look at three different aspects of the landscape as seen in dictionaries from across Europe. Multilingual diachronic case studies into lexicographical descriptions of flora, landscape features and colours concentrate on three supposedly simple words: daisies (*Bellis perennis* L.), hills and the colour red. The work is part of the ongoing LandLex initiative, originally developed as part of the COST ENeL - European Network for e-Lexicography - action. The group brings together researchers in lexicography and lexicology from across Europe and is dedicated to studying multilingual and diachronic issues in language. It aims to valorise the wealth of European language diversity as found in dictionaries by developing and testing new

digital annotation tools and a historical morphological dictionary prototype. Funded by the Horizon 2020 Framework Programme of the European Union *The White Goddess* Prabhat Prakashan This study of the emergence of Romance and its crystallization into French, Spanish, Italian, Rumanian, etc. elucidates not only the creation of the modern languages but also the decline of Latin. The author provides as a setting the world of 'Vulgar Latin', a Roman world where the Latin tongue showed all the anarchical tendencies of popular speech and to which the mingling peoples in the Empire brought new and linguistically exotic elements. He explains how, from the fifth century to the ninth, the forces which procured Rome's political weakening at the same time accelerated the disintegration and differentiation of the

Latin vernacular, though enriching it with contributions of their own--Germanic, Arabic, and Slavonic.

Stories about dragons, serpents, and their slayers make up a rich and varied tradition within ancient mythology and folklore. In this sourcebook, Daniel Ogden presents a comprehensive and easily accessible collection of dragon myths from Greek, Roman, and early Christian sources. Some of the dragons featured are well known: the Hydra, slain by Heracles; the Dragon of Colchis, the guardian of the golden fleece overcome by Jason and Medea; and the great sea-serpent from which Perseus rescues Andromeda. But the less well known dragons are often equally enthralling, like the Dragon of Thespieae, which Menestratus slays by feeding himself to it in armor covered in fish-hooks, or the lamias of Libya, who entice young men into their striking-range by wiggling their tails, shaped like beautiful women, at them. The texts are arranged in such a way as to allow readers to witness the continuity of and evolution in dragon stories between the Classical and Christian worlds, and to understand the genesis of saintly dragon-slaying stories of the sort now characteristically associated with St George, whose earliest dragon-fight concludes the volume. All texts, a considerable number of which have not previously been available in English, are offered in new translations and accompanied by lucid commentaries that place the source-passages into their mythical, folkloric, literary, and cultural contexts. A sampling of the ancient iconography of dragons and an appendix on dragon slaying myths from the ancient Near East and India, particularly those with a bearing upon the Greco-Roman material, are also included. This volume promises to be the most authoritative sourcebook on this perennially fascinating and influential body of ancient myth.

The Juggler of Notre Dame and the Medievalizing of Modernity. Legas /

Gaetano Cipolla

This labyrinthine and extraordinary book, first published more than fifty years ago, was the outcome of Graves's vast reading and curious research into strange territories of folklore, mythology, religion and magic. Erudite and impassioned, it is a scholar-poet's quest for the meaning of European myths, a polemic about the relations between man and woman, and also an intensely personal document in which Graves explored the sources of his own inspiration and, as he believed, all true poetry. This new edition has been

prepared by Grevel Lindop, who has written an illuminating introduction. The text of the book incorporates all Graves's final revisions, as well as his replies to two of the original reviewers, and a long essay in which he describes the months of inspiration in which *The White Goddess* was written.

An amazing work of esoteric knowledge compiled in a two volume set. Higgins shows a dedication to the philosophic, alchemic, scientific and even religious sides of the mystical arts and sects, with profound insight into everything from Atlantis to Zion. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

Among all vertebrates, gobies are second in diversity only to the teleost family Cyprinidae. The Gobiidae consists of more than 200 genera and nearly 2,000 species and make up the largest family of marine fishes. Gobies account for as much as 50% of the energy flow in coral reef communities. Their small size, ability to adapt to numerous ecological niches and to be bred in aquaria has led to numerous studies both in the field and laboratory. Gobies are found from above the high tide line to depths of over 1,100 m. Some species are found only within caves, others deep inside sponges, and some others climb waterfalls to return to their native streams. They vary reproductively from gonochoric to hermaphrodite, monogamy to polygyny and promiscuity, some have short life spans and reproduce

only once while others have longer life spans reproducing one or more times per year. *The Biology of Gobies* written by over 30 experts from 15 countries summarizes what is known about the systematics, ecology, zoogeography, and general biology of the Gobiiformes. This foundation will provide the basic information necessary for future studies.

Bayou Folk is a Chopin's classic book containing of 23 masterpiece short stories shows rural life in Louisiana after the American Civil War and how former slaves, people of color, women, poor whites, and wealthy whites chafed against social restrictions. Kate Chopin (1850-1904) is an American writer best known for her stories about the inner lives of sensitive, daring women. Her novel *The Awakening* and her short stories are read today in countries around the world, and she is widely recognized as one of America's essential authors. Her short stories were well received in in the 1890s and were published by some of America's most prestigious magazines--*Vogue*, the *Atlantic Monthly*, *Harper's Young People*, the *Youth's Companion*, and the *Century*. A few stories were syndicated by the American Press Association. Many of her stories also appeared in her two published collections, *Bayou Folk*(1894) and *A Night in Acadie* (1897), both of which received good reviews from critics across the country who praised them for their graceful descriptions of the lives of Creoles, Acadians, African-Americans, and other people in Louisiana. Twenty-six of

her stories are children's stories--those published in or intended for children's or family magazines--the Youth's Companion and others. By the late 1890s Kate Chopin was well known among American readers of magazine fiction. Her early novel *At Fault* (1890) was not much noticed, but *The Awakening* (1899) was widely condemned. Critics called it morbid, vulgar, and disagreeable. Chopin's work was mostly forgotten after her death, but, beginning in the 1950s, scholars rediscovered it and praised it for its truthful depictions of women's lives.

This book examines sports doping from production and distribution, detection and punishment. Detailing the daily operations of the trade and its gray area as a semi-legal market, the authors cover important issues ranging from athletes most at risk to the role of organized crime in sports doping, and whether sports governing bodies are enabling the trade. Challenges for law enforcement and legislation, and efforts to control PED use in the worldwide sports community and among aspiring athletes, are also discussed in depth. The book's extensive research: • Estimates the demand for performance-enhancing products. • Traces the route from legal substances to illegal uses. • Identifies classes of suppliers and their methods of operation. • Tracks typical distribution systems from suppliers to users. • Examines the economics of the market: prices, profits, revenue. • Assesses the state of anti-doping law enforcement efforts. Starting with an unprecedented case study in Italy, the intense scrutiny from one pivotal country yields a potential template for research and policy on a world scale. *Doping and Sport* makes solid contributions to the work of researchers in criminology and criminal justice, particularly with an interest in corruption, drug trafficking, and criminal networks; researchers in sports science and public health; and policymakers.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." - an excerpt

Dragons, Serpents, and Slayers in the

Classical and Early Christian Worlds

Harvard University Press

No proof is needed of the value of the quotations in the New Testament. It is obvious that they help us very greatly to understand the material and the character of the New Testament thought. They furnish a connecting link between the two great religious creations of the Hebrew race, Israelitism and Christianity. Old Testament and New Testament, though substantially identical in their religious conceptions, represent very different conditions of civilization and culture; they are separated from each other not only by centuries of time, but also by great social and political changes. Throughout these changes, however, the sacred volume of the nation, the Old Testament, preserved its authority as divine revelation, and supreme law of faith and life, for the Christian evangelists and apostles, as well as for the Jewish rabbis. How, then, we naturally ask, do the expounders of the new religious movement deal with the sacred books of their nation, the writings of the ancient prophets and priests and sages? What is their method of interpretation? How do they understand the instructions, exhortations, and predictions of the past? How do they fit the old order of things into the new? It is the quotations that give us answers to these questions. - Preface.

It includes most relevant case studies and novel research results addressing technical and methodological aspects of computers and educations. It is relevant to researchers, practitioners, teaching staff and developers working in e-learning, computer-based education, educational software, distributed learning, lifelong learning, and open and distance learning. Species Pools of Seed Plants in Eastern Asia and North America Springer Nature tool designed to achieve proficiency at Latin in one year at the college level, two years at the high school or intermediate level. The volume provides students with imaginative, connected reading, beginning with introductory prose versions of Ovid's simple myth tales and progressing to the rich poetry of Ovidian Latin (with appropriate teaching aids) within forty

lessons. The grammatical approach is traditional, but the central emphasis is on reading. In each chapter the reading appears first, followed by the vocabulary, the grammar, exercises, and etymology relating to the vocabulary. The exercises begin with a group of questions in Latin (based on the reading), to be answered in Latin. Each tale is preceded by a brief discussion in English of the story and its mythological significance. The myths retold by Ovid and the attractive format are conceived to impel the student into acquiring the skill to read the author in the original language. Individual essays address issues raised by the science, politics, and history of race, evolution, and identity; genetically modified organisms and genetic diseases; gene work and ethics; and the boundary between humans and animals. The result is an entree to the complicated nexus of questions prompted by the power and importance of genetics and genetic thinking, and the dynamic connections linking culture, biology, nature, and technoscience. The volume offers critical perspectives on science and culture, with contributions that span disciplinary divisions and arguments grounded in both biological perspectives and cultural analysis.

This book discusses the Lagoa Santa Karst, which has been internationally known since the pioneering studies of the Danish naturalist Peter Lund in the early 1800s. It covers the speleogenesis, geology, vegetation, fauna, hydrogeology, geomorphology, and anthropogenic use of the Lagoa Santa Karst and is the first English-language book on this major karst area. The area, which has been at the heart of the debate on the origin and age of human colonization in the Americas, is characterized by a classical and scenic karst landscape with limestone cliffs, karst lakes and karst plains, in addition to numerous solution dolines. More than 1,000 caves have been documented in the area, many with significant archeological and paleontological value. Despite its great importance, the Lagoa Santa Karst

faces severe environmental threats due to limestone mining and the expansion of the metropolis of Belo Horizonte and its surrounding towns. The growing recognition of the area's remarkable significance has led to increasing concern, and a number of protected areas have now been established, improving the conservation status of this landmark karst

area.

The Works of Thomas Vaughan, Mystic and Alchemist Faber & Faber

In this philosophy classic, which was first published in 1951, E. R. Dodds takes on the traditional view of Greek culture as a triumph of rationalism. Using the analytical tools of modern anthropology and psychology, Dodds asks, "Why should

we attribute to the ancient Greeks an immunity from 'primitive' modes of thought which we do not find in any society open to our direct observation?" Praised by reviewers as "an event in modern Greek scholarship" and "a book which it would be difficult to over-praise," *The Greeks and the Irrational* was Volume 25 of the Sather Classical Lectures series.
