Basic Concepts in Clinical Biochemistry: A Practical Guide Pustak Mahal

• On a lazy Sunday afternoon, after a lunch of succulent pork and chilled beer, Andrea settles down with her uncle and aunt to retell family stories of Akkai, a Roman Catholic nun (and Andrea's great-aunt), who died under mysterious circumstances. • This gets Andrea thinking about the lives of the other nuns in the family – like bold and brassy, salsa-dancing great-aunt Deidre, who left the convent to be the Principal of a college; others soft and steely like Akkai, and the don-like Stella Marie, a nursing superintendent. • Andrea realizes these women have played a large part in the architecture of her childhood in the Mangalorean Catholic community of Bangalore. • As she talks to family members about the nun-aunts, Andrea unearths some peculiar and quirky aspects. Through whispered stories in the family, she comes to appreciate the porous convent walls the nun-aunts and the family navigate. • But she also encounters unexpected reticence from some of the family, whose memories of the nun-aunts are somewhat differently textured. • This richly human memoir tells the story of how a young girl finds her way through a flood-tide of recollections and emotion to navigate the tricky shoals of family ties, in an effort to bring closure to the family past.

It gives me great pleasure to introduce this book on HISTOPATHOLOGY for Medical Laboratory Technology Students. In this book I have tried to solve the difficulty of students to understand the tests and getting the exact data. The aims and objectives of this book are primarily to meet the requirements of DMLT and undergraduates Courses. Histopathology is an essential subject of DMLT courses, but there is non-availability of good books on the subject. The books available are vast and mainly written for medical, dental, physiotherapy, nursing students. I have tried to overcome this problem by writing in easy language, point-wise manner, diagrams, flow charts, tables, graphs, pictures and providing exact data. I hope that this book will satisfy the needs of DMLT students as well as UG students. This book composes units. All units such as, Histopathology, Clinical pathology, cytology, exfoliative cytology etc. Finally, we can say this book is based upon the DMLT syllabus of the various Paramedical state councils, especially JKSPMF and JKBOTE. Finally, although sincere effort has been made to be as accurate as possible, an element of human error is still likely. I shall humbly request users to continue giving their valuable suggestions and feedback as they have been doing. Before for my all books, this helps me much to learn from the experience of users, improve further and carry out corrections wherever required, at the earliest possible opportunity,
