The role of global capital in relation to human social systems has assumed enormous proportions in liberalised, deregulated markets. States attempt to nationalise it, financial centres spring up in its wake, and INGOs attempt to deal with its de-territorialising, supranational characteristics. A global adjudication system (arbitration) has been introduced to safeguard and buttress its flow. The power of Islamic capital has generated numerous sites of legal contestation and negotiation, ranging from gateway financial centres, international law firms and transnational financial institutions, all of which interact in the production of Islamic financial law (IFL). The process of producing

IFL illustrates complex fields of action driven by power dynamics, neoliberal paradigms and the institutional momentum of the global economy. The municipal legal systems under study in this book (the United Kingdom, Bahrain, United Arab Emirates and the Dubai International Financial Centre) illustrate globalisation's acceleration of legal, economic and social production.

European Capital Markets Law PHI Learning Pvt. Ltd.

Offers a plan to replace some insured deposits with uninsured deposits (UD). The FDIC would guarantee loan contracts if the loan takers deposited the proceeds exclusively in UD and backed those deposits with equity. This equity would ensure that the loan takers could share the likely costs if any of their depositories failed. The loans made under FDIC guarantee would only require interest at the risk-free rate. Thus the loan takers could offer the proceeds at lower rates than the rates paid on current deposits. Therefore, funding by banks would shift to the new deposits, and since the new self-insured depositors would have equity at stake, they would have to monitor their banks and impose rate premiums based on each bank's risk. A detailed assessment on the observance of Mexico's compliance with International Organization of Securities Commissions objectives and principles of securities regulation is presented. The regimes governing the regulation of issuers, collective investment schemes, and secondary markets, and with respect to cooperation and information sharing, are extensive. The most significant issues regarding full implementation of the Principles fall under the Regulator Principles. Much of the activity on the Bolsa Mexicana de Valores comes from computer-driven program trading orders that are placed to take advantage of price asymmetries between markets.

Contemporary Financial Intermediation, Second Edition, brings a unique analytical approach to the subject of banks and banking. This completely revised and updated edition expands the scope of the typical bank management course by addressing all types of deposit-type financial institutions, and by explaining the why of intermediation rather than simply describing institutions, regulations, and market phenomena. This analytic approach strikes at the heart of financial intermediation by explaining why financial intermediaries exist and what they do. Specific regulations, economies, and policies will change, but the underlying philosophical foundations remain the same. This approach enables students to understand the foundational principles and to apply them to whatever context they encounter as professionals. This book is the perfect liaison between the microeconomics realm of information economics and the real world of banking and financial intermediation. This book is recommended for advanced undergraduates and MSc in Finance

students with courses on commercial bank management, banking, money and banking, and financial intermediation. Completely undated edition of a classic banking text Authored by experts on financial intermediation theory, only textbook that takes this approach situating banks within microeconomic theory

Influenced by technological innovation, banks and their businesses are changing dramatically. This book explores the transformation and prospects of financial market institutions (banks, insurance companies, pension funds and microfinance organizations) in the context of the development of financial innovation, financial engineering and financial technologies, taking into account risks and new opportunities for development. It presents new approaches to the sustainable development of financial and credit institutions, taking into account the risk management and crisis management of their activities in the macro and microeconomic environment. Contributors from Russia, Kazakhstan, Azerbaijan, Mongolia, Ireland and Italy present their expert opinions on the practice of financial intermediaries in the conditions of economic transformation under the influence of the 4th Industrial Revolution and the Covid-19 pandemic. This book includes some of the key debates in this area including the genesis of financial markets in the paradigm of economic digitalization, the evolution of financial intermediaries from the classical model to the ecosystem, and the regulation of neo-banks. The book will be of interest to academics and practitioners in various spheres of theoretical and empirical knowledge, including economics, finance and banking, who are interested in investigation of the complex of fundamental (international and domestic) trends in the development of financial intermediation in the globalized financial markets.

“The richness, clarity and nuances of the structure and methodology followed by the contributors make the book a very valuable tool for students... seeking to obtain a general understanding of the market and how it is regulated.” – Ligia Catherine Arias Barrera, *Banking & Finance Law Review*

The fully updated edition of this user-friendly textbook continues to systematise the European law governing capital markets and examines the underlying concepts from a broadly interdisciplinary perspective. The 3rd edition deals with 3 central developments: the project of the capital markets union; sustainable finance; and the further digitalisation of financial instruments and securities markets. The 1st chapter deals with the foundations of capital markets law in Europe, the 2nd explains the basics, and the 3rd examines the regime on market abuse. Chapter 4 explores the disclosure system and chapter 5 short-selling and high-frequency trading. The role of intermediaries, such as financial analysts, rating agencies, and proxy advisers, is described in chapter 6. Chapter 7 explains compliance and corporate governance in investment firms and chapter 8 illustrates the regulation of benchmarks. Finally, chapter 9 deals with public takeovers. Throughout the book emphasis is placed on legal practice, and frequent reference is made to the key decisions of supervisory authorities and courts. This is essential reading for students involved in the study of capital markets law and financial law.

The third edition of this invaluable guide covers the application and practice of the law of set-off in over 30 jurisdictions spanning Europe, Asia and the Americas. Written by leading experts from around the world, each chapter explains the principles of the law of set-off in the jurisdiction concerned, and provides a comparative guide for banking and finance lawyers wishing to establish the pitfalls of set-off in a foreign jurisdiction. For this new edition every chapter has been updated to contain new material specifically devoted to cross border aspects, including analysis of choice of law issues. Fully updated legal analysis is also provided, with an emphasis on how set-off may be used as security and the application of insolvency set-off: taking into account new legal

developments in the various jurisdictions and reflecting recent changes to legislation in the financial sector relating to bank and other financial firm resolution.
