While most
scholars who
study
children's
books are pre-
occupied with

the child characters and adult mediators, Vanessa Joosen repositions the lens to focus on the under-explored construction of adulthood in children's literature. *Adulthood in Children's Literature* demonstrates how books for young readers evoke adulthood as a stage in life, enacted by adult characters, and in relationship with the construction of childhood. Employing age

studies as a framework for analysis, this book covers a range of English and Dutch children's books published from 1970 to the present. Calling upon critical voices like Elisabeth Young-Bruehl, Margaret Morganroth Gullette, Peter Hollindale, Maria Nikolajeva and Lorraine Green, and the works of such authors as Babette Cole, Philip Pullman, Ted van Lieshout, Jacqueline Wilson,

Salman Rushdie and Guus Kuijer, Joosen offers a fresh perspective on children's literature by focusing not on the child but the adult. *The Whales' Song* Cherry Lake The customs and spirituality of the traditional communities of the highlands and islands of Scotland were preserved in a way that has been lost to most people today. Jones describes the vital roles of women in those

communities, with their customary powers of "seeing," healing, blessing, and cursing. Their hospitality, conviviality, and deep wisdom, together with their celebration of the tasks of daily life, have much to teach us today in our modern way of life. *Naturalist's Guide to the Americas* Random House (UK) Shows how an understanding of behaviour is essential in the conservation

of animals. *Isabel of the Whales* Springer Nature This book builds on the guidance given by the Primary Strategy for Literacy. By 'filling in the gaps' that the planning documentation leaves, the book provides teachers with the structures and ideas to plan creatively and effectively for their children whilst following and enhancing the recommendations of the strategy. It includes: clear and practical

ways to plan units of work that embrace reading, writing, speaking and listening, in exciting and active ways examples of effective practice using children's work that highlight the effects of creative planning suggestions for texts and resources that can be included in half-termly and termly planning. Written by a team of leading educationalists and teacher educators in

the primary literacy field, this edited collection is a must-have for primary teachers wishing to inject creativity into the planning of their literacy lessons.

Ecology in Action

Routledge
Keiko is not happy to be staying in her great grandfather's house while her parents are away. But she discovers that there is far more to life in the countryside than she first thought:

walnut sailboats, straw snowboots, great grandfather's stories and the magic of New Year.
Developing Children's Critical Thinking through Picturebooks
Bloomsbury Publishing
This accessible text will show students and class teachers how they can enable their pupils to become critical thinkers through the medium of picturebooks. By introducing

children to the notion of making-meaning together through thinking and discussion, Roche focuses on carefully chosen picturebooks as a stimulus for discussion, and shows how they can constitute an accessible, multimodal resource for adding to literacy skills, while at the same time developing in pupils a far wider range of literary understanding . By allowing time for thinking about

and digesting the pictures as well as the text, and then engaging pupils in classroom discussion, this book highlights a powerful means of developing children's oral language ability, critical thinking, and visual literacy, while also acting as a rich resource for developing children's literary understanding. Throughout, Roche provides rich data and examples from real classroom

practice. This book also provides an overview of recent international research on doing 'interactive read alouds', on what critical literacy means, on what critical thinking means and on picturebooks themselves. Lecturers on teacher education courses for early years or primary levels, classroom teachers, pre-service education students, and all those interested in

promoting critical engagement and dialogue about literature will find this an engaging and very insightful text.

Books For
Young
Readers
Against a
backdrop of
ever-changing
government
initiatives and
strategies, it is

essential that you have a firm vision for the roles and purposes of education to inform your interpretation of education. This accessible and engaging book provides you with the scaffolding to develop your reflective practice as you journey towards developing your own philosophy of education. It enables you to consider how your aspirations and vision can be enacted in practical ways in the

classroom and provides a means to evaluate and analyse your own practice. The structure of the book and its individual chapters guides you through supported reflective activities and case study examples so that the exploration of educational philosophy is thoroughly grounded in professional practice. The book offers: Supported reflection on values underpinning primary

education
Practical examples to set theory within context
An issues-based approach to pedagogy and curriculum
Examples of philosophy and practice developed by practitioners
With its wide range of thought-provoking ideas, examples and case studies, this is an excellent resource if you are thinking about becoming a teacher, training to teach or beginning

your teaching career. "This book reaffirms in a very readable and engaging way the liberal, humane values that have informed, and still inform, the work of so many primary schools and teachers. It challenges its readers to engage personally with both values and vision. This is particularly necessary in the current context where primary education is in danger of being replaced by primary schooling through government diktat. The book is part of the principled resistance necessary to combat this menace to English childhood and teacher professionalism." Colin Richards, former senior HMI and Emeritus Professor, University of Cumbria, UK

"A book putting children at the centre of education is a rare delight. It sloughs away the boredom of government directives and the 'compliant culture' (Compton) that follows. Chapters begin with eye-catching vignettes about learning. The text is evocatively written and, like a good novel, has memorable nuggets at regular intervals: e.g. Taylor's 'curiosity is all about possibilities.' The book delivers practical approaches for student/teachers by practitioners.

It is refreshing in its willingness to articulate values. Kimaliro and Woolley present the challenge for us all: 'how can teachers make possible the dreams that are to shape tomorrow's pathways?'" Dr Trevor Kerry, Emeritus Professor, University of Lincoln, UK & Visiting Professor, Bishop Grosseteste University, UK "This book enters the initial teacher education field

almost like a breath of fresh air because it reminds us of children and their worlds. The contributors tackle some of the 'big ideas' in education and provide a strong foundation for those students in initial teacher education who might be seeking to make sense of their emerging role as educators. Each of the chapters contextualises its theme within the recognisable curriculum orthodoxies of

primary education but seeks to expand these margins and place children once again at the centre of the curriculum. The editors deserve congratulations in remind all of us about the purposes of primary education." Dr Robyn Cox Associate Professor Literacy Education, Strathfield Faculty of Education Australian Catholic University, Australia Contributors: Ashley Compton;

Linda Cooper; Karen Elvidge; Nigel Hutchinson; Eunice Kimaliro; Lindy Nahmad-Williams; Rachael Paige; Mike Steele

Power of Raven, Wisdom of Serpent

Plan for six weeks of learning covering all six areas of learning and development of the EYFS through the topic of the sea. The Planning for Learning series is a series of topic books written around the

Early Years Foundation Stage designed to make planning easy. This book takes you through six weeks of activities on the theme of the sea and oceans. Each activity is linked to a specific Early Learning Goal, and the book contains a skills overview so that practitioners can keep track of which areas of learning and development they are promoting. This book also includes a photocopiable

page to give to parents with ideas for them to get involved with their children's topic, as well as ideas for bringing the six weeks of learning together. The weekly themes in this book include: what are sea and oceans; sand, shells and pebbles; boats and shops; sea creatures and plants and sea and beach safety.

Nelson's Perpetual Loose-leaf Encyclopaedia
a Folens Limited

'This book aims high; its aspiration and rationale are to be welcomed and applauded....an original and valuable contribution to the literature of early childhood education' - Early Years

"Early Childhood Education" is an extremely valuable and informative book that emphasises the role of history and philosophy in current early childhood practices....this book is accessible, clearly structured and an essential reference for students of Childhood Studies. I would highly recommend this text as an introduction' - ESCalate

'This book makes a refreshing change to a lot of textbooks....It's easy to read, in short chunks, and you don't want to put it down. Well worth investing in this book. I would give this book 9 out of 10' - The National Childminding Association

'This book is an essential, informative read for practitioners and policymakers alike. It encourages reflection, prompts discussion and dialogue and facilitates the building of a common understanding through making us all aware of whose shoulders we are standing on' - Early Years Update

'Every Early Childhood practitioner and policy-maker should keep a copy of this book on their

shelves...a thought provoking, and highly informative celebration of the ideas of our field's pioneers. If we are to understand ourselves and our times, and to provide lovingly meaningful experiences for today's young children, we need to understand their web of philosophical legacies and the links with our own' - Professor Tricia David, Emeritus Professor Canterbury

Christ Church University and Honorary Emeritus Professor, University of Sheffield This book explores the ideas behind the policies and practices in Early Childhood Education to help give students and practitioners a fuller understanding of the settings in which they work. The authors bring together ideas from the work and writings of major historical figures who have significantly

shaped Early Childhood current practices to illustrate the rich history of this ever developing field. Using imaginative tools to bring alive the ideas of past pioneers, the authors show how our understanding of contemporary issues has been influenced by the pioneers. The book also shows how today's practitioners themselves become the pioneers of future development.

This book is for all students of Early Childhood Education including those on BA and MA courses, as well as Early Years trainee teachers. It is also relevant to practitioners involved in self - or organisational development. [A Guided Reader to Early Years and Primary English](#) Wesleyan University Press The My Favorite Animal series lets the

earliest readers explore the animal kingdom. Red Fox examines the characteristics and habitat of the sly forest mammal in a simple way that will help children develop word recognition and reading skills. Includes a glossary and index.

Literacy on Display Andrews UK Limited Contemporary Irish Poetry and the Climate Crisis addresses what is arguably the most crucial

issue of human history through the lens of late-twentieth and early twenty-first-century Irish poetry. The poets that it surveys range from familiar presences in the contemporary Irish literary canon - Seamus Heaney, Derek Mahon, Paula Meehan, Moya Cannon - to lesser-known figures, such as the experimental poet Maurice Scully, contemporary poets Stephen Sexton and Sean Hewitt,

and the Irish-language poets Simon Ó Faoláin, Bríd Ní Mhóráin, and Máire Dinny Wren. Adopting a variety of ecotheoretical approaches, the essays gathered here address several interrelated themes crucial to the climate crisis: the way in which the scalar scope of climate change interweaves local and global, distant past and imminent future, nature and culture; the critical importance of

acknowledging the complex kinship of the human and nonhuman; and the necessity of warning against the devastating environmental losses to come while mourning those that already occurred. Ultimately, by envisioning new ways of existing on an earth that humans no longer dominate, this book engages in what the philosopher Jonathan Lear refers to as a process of 'radical

anticipation'. *Great Grandfather's House* Routledge
 `In its third edition...the author has included the latest research evidence relating to children aged from nought to eight. Her writing embraces the value of play, relationships, bilingualism and multilingualism in creating a rich language and literacy environment. Developing Language and Literacy with Young

Children will appeal to a wide range of readers - practitioners, students, and their tutors, as well as parents and carers' - Early Years Update 'Highly readable... Anybody working with babies and young children needs to have the knowledge that Whitehead clearly explains here' - SureStart 'One of the many excellent features of this book is the way it tackles the issue of bilingualism in early childhood' - Early Years Educator (eye) Praise for previous editions: 'Marian Whitehead forces the reader to attend to the "voice of the child against the encroachment of inappropriate curriculum demands. Her total fascination for children's language development captures the reader in an enthusiastic and informed voyage through "the most exciting and important aspect of human development - language in the early years' - Early Years 'This is an excellent read for all parents and workers with young children. The style of the book is friendly and accessible, with beautifully produced photographs of children and indeed of their own work. Marian Whitehead is not ashamed to draw on her experiences

as a grandparent, as well as highly competent theoretical researcher; she does both with competence and humour. This will prove an excellent source book for those involved in course design from childminders to university lecturers' - Child Language Teaching and Therapy Looking at the most exciting and important aspect of human development - communicatio

n and language in the early years - this accessible book gives carers, parents, teachers and other professionals who work and play with young children a confident understanding of children's communicatio n and language development in the years from birth to age eight. The book examines the wide range of elements that are typical of all our communicatio

n and language activities: thinking, feeling, imagining, talking, listening, drawing, writing and reading. The author emphasizes the importance of children's relationships and communicatio ns with the people who care about them, spend time with them and share in the excitement of their developing languages and their investigations

<p>of literacy. Taking a holistic approach, she covers: o early communication and language o the achievements of young bilinguals o the significance of stories, narrative and language play o the emergence of literacy in homes, early years settings and classrooms. 'This highly readable guide discusses how to help babies become competent communicators</p>	<p>s...Anybody working with babies and young children needs to have the knowledge that Whitehead clearly explains here' - SureStart <u>Adulthood in Children's Literature</u> Yearling Provides a look at the fascinating activities of all types of animals from birth to maturity, as they attract a mate, care for their young, find food and shelter, and defend themselves-- written a team</p>	<p>of international experts. <u>The Friend</u> Random House A Guided Reader to Early Years and Primary English draws on extracts from the published work of some of the most influential education writers to provide insight, guidance and clarity about key issues affecting early years practitioners and primary English teachers. The book brings together key</p>
---	--	---

extracts from classic and contemporary writing and contextualises these in both theoretical and practical terms. The extracts are accompanied by a summary of the key ideas and issues raised, questions to promote discussion and reflective practice, and annotated further reading lists to extend thinking. Taking a thematic approach and including a short introduction to each theme,

the chapters cover: Models of and approaches to early years and primary English; Speaking and listening in English lessons: story-telling, drama, 'booktalk' and debate; Reading and responding to texts in English lessons; Writing in English lessons: finding a 'voice'; Knowledge about language: grammar, spelling, punctuation and handwriting;

The rich landscape of children's literature; Non-fiction in English lessons; Planning, assessing and recording children's progress: the learning cycle. Aimed at trainee and newly qualified teachers, those working towards Masters level qualifications and all those involved in the teaching of early years and primary English, this accessible, but critically provocative text will be an

essential resource for those that wish to deepen their understanding of early years and primary English education.

Planning for Learning through the Sea SAGE

In this book, an international team of leading marine mammal scientists, with a remarkably diverse set of backgrounds and areas of expertise, lead you through a synthesis of current

knowledge on baleen whales. Baleen whales are the largest animals ever to have lived on this planet. They also have the lowest and most intense voices on Earth, most likely evolved to take advantage of ocean acoustic transmission conditions so as to be detectable across ocean basins. Some baleen whales can live to be 150-200 years old. They migrate many thousands of kilometers

between feeding and breeding areas. They produce songs and calls that serve as behavioral foundations for establishing, maintaining and expanding their cultural identities. To conclude that we know the behavioral limits of these large brained, long-lived animals would be naïve. As baleen whale scientists, we are still beginning to comprehend the enormous complexities and natural

histories of these remarkable animals. Today, the fact that whales sing is known throughout much of the world. This awareness started 50 years ago with the publication and popularization of a collection of humpback song recordings that motivated research into baleen whale behavioral ethology. In this book's chapters, a reader's experiences

will stretch from learning about baleen whale laryngeal anatomy associated with their different voices to learning about the vast ocean areas over which their voices can be heard and the emerging complexities of their culturally defined societies. These are accompanied by chapters on the fundamental ethological contexts of socializing, migrating, and foraging. Two

common themes permeate the book. One theme highlights the phenomenal increase in scientific knowledge achieved through technological advancements . The other theme recognizes the impacts of human-made activities on ocean acoustic environments and the resultant influences on the health and survival of individual whales and their populations.

Although the book is intentionally ambitious in its scope, as scientists, we fully recognize that baleen whale science is still in its infancy. Many profound revelations await discovery by cohorts of young, multi-talented explorers, some of whom are stretching their wings in this volume and some of whom are reading these scientific stories for the first time.
