 The International Handbook on Teaching and Learning Economics is a power packed resource for anyone interested in investing time into the effective improvement of their personal teaching methods, and for those who desire to teach students how to think like an economist. It sets

guidelines for the successful integration of economics into a wide variety of traditional and non-traditional settings in college and graduate courses with some attention paid to primary and secondary classrooms. . . The International Handbook on Teaching and Learning Economics is highly recommended for all economics instructors and individuals supporting economic education in courses in and outside of the major. This Handbook provides a multitude of

rich resources that make it easy for new and veteran instructors to improve their instruction in ways promising to excite an increasing number of students about learning economics. This Handbook should be on every instructor's desk and referenced regularly. Æ Tawni Hunt Ferrarini, The American Economist Æ In delightfully readable short chapters by leaders in the sub-fields who are also committed teachers, this encyclopedia of how and what in teaching

economics covers everything. There is nothing else like it, and it should be required reading for anyone starting a teaching career Æ and for anyone who has been teaching for fewer than 50 years! Æ Daniel S. Hamermesh, University of Texas, Austin, US The International Handbook on Teaching and Learning Economics provides a comprehensive resource for instructors and researchers in economics, both new and experienced. This wide-ranging collection is

designed to enhance student learning by helping economic educators learn more about course content, pedagogic techniques, and the scholarship of the teaching enterprise. The internationally renowned contributors present an exhaustive compilation of accessible insights into major research in economic education across a wide range of topic areas including: ¥ Pedagogic practice Đ teaching techniques, technology use, assessment, contextual

techniques, and K-12 practices. ¥ Research findings Đ principles courses, measurement, factors influencing student performance, evaluation, and the scholarship of teaching and learning. ¥ Institutional/administrative issues Đ faculty development, the undergraduate and graduate student, and international perspectives. ¥ Teaching enhancement initiatives Đ foundations, organizations, and workshops. Grounded in

research, and covering past and present knowledge as well as future challenges, this detailed compendium of economics education will prove an invaluable reference tool for all involved in the teaching of economics: graduate students, new teachers, lecturers, faculty, researchers, chairs, deans and directors.

This book offers a comprehensive overview

of current, innovative approaches to assessing generic and domain-specific learning outcomes in higher education at both national and international levels. It discusses the most significant initiatives over the past decade to develop objective, valid, and reliable assessment tools and presents state-of-the-art procedures to adapt and validate them for use in other countries. The authors highlight key conceptual and methodological challenges connected

with intra-national and cross-national assessment of learning outcomes in higher education; introduce novel approaches to improving assessment, evaluation, testing, and measurement practices; and offer exemplary implementation frameworks. Further, they examine the results of and lessons learned from various recent, world-renowned research programs and feasibility studies, and present results from their own studies to provide new

insights into how to draw valid conclusions about learning outcomes achieved in various contexts.
