Masters Theses in the Pure and Applied Sciences was first conceived, published, and disseminated by the Center for Information and Numerical Oata Analysis and Synthesis (CINOAS) * at Purdue. University in 1957, starting its coverage of theses with the academic year 1955. Beginning with Volume 13, the printing and dissemination phases of the activity were transferred to University Microfilms/Xerox of Ann Arbor, Michigan, with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community. After five years of this joint undertaking we had concluded that it was in the interest of all con cerned if the printing and distribution of the volumes were handled by an interna tional publishing house to assure improved service and broader dissemination. Hence, starting with Volume 18, Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Cor poration of New York, and in the same year the coverage was broadened to include Canadian universities. All back issues can also be ordered from Plenum. We have reported in Volume 33 (thesis year 1988) a total of 13,273 theses titles from 23 Canadian and 1 85 United States universities. We are sure that this broader base for these

titles reported will greatly enhance the value of this important annual reference work. While Volume 33 reports theses submitted in 1988, on occasion, certain univer sities do report theses submitted in previous years but not reported at the time. *Independent Schools Yearbook 2012-2013* Cosimo, Inc.

Once considered the largest and most extensive source of biographies in the English language, The Universal Dictionary of Biography and Mythology contains information on nearly every historical figure, notable name, and important subject of mythology from throughout the world prior to the 20th century. Spanning all fields of human effort-from literature and the arts to philosophy and science-and touching on topics from multiple areas of mythological study, including Norse, Greek, and Roman, this extraordinary reference guide continues to be one of the most thorough and accurate collections of biographical data ever created. Combining mythological and biographical entries into a single, comprehensive list, and incorporating a unique system of indicating pronunciation and orthography, The Universal Dictionary of Biography and Mythology offers readers an unparalleled record of historically significant identities, from the obscure and forgotten newsmakers of yesteryear to the highly celebrated shapers of history that remain influential today. Volume I (A-CLU) of this exquisite four-volume set includes information on such names as John Quincy Adams, Achilles, sop, Napoleon Bonaparte, Julius Caesar, and Cleopatra, as well as a detailed introduction to the entire body of this work. JOSEPH THOMAS (1811-1891) also wrote A Comprehensive Medical Dictionary, various pronouncing vocabularies of biographical and geographical names, and a system of pronunciation for

Lippincott's Pronouncing Gazetteer of the World.

The book provides a full general purpose and application-independent exposition of the subject. Throughout the whole text the book favours a pictorial, intuitive approach which is supported by mathematics, and the discussion is accompanied by a large number of figures and illustrative examples.
