 This book discusses various dimensions of Indian fiscal federalism, focusing on the current fiscal imbalances - both vertical and horizontal - and their correction. Throwing light on different angles of this subject, it presents well-researched papers, which are divided into three sections. The first section, 'Fiscal federalism and resolving the fiscal imbalances', includes five chapters that discuss this theme and also explain the various strategies to remove the existing imbalances in India. 'Fiscal decentralization for high growth' which is the second section, explains how decentralisation leads to high economic growth and showcases empirical evidence from a few Indian states that are flourishing due to this policy. The third section, 'Emerging issues' offers six chapters describing several existing key concerns in fiscal federalism that have a major impact on achieving India's development goals. Including contributions from leading academics in this field, the book will be of great interest to research scholars and policy makers alike. "Besides addressing the core issue of fiscal imbalances and ways to correct them, the [chapters] touch on several issues confronting the Indian fiscal system at the centre, state and local levels. The [chapters] are well researched and well argued. The book is a valuable addition to the literature on Fiscal Federalism." - Dr. C. Rangarajan, Ex-Governor of Reserve Bank of India; Chairman, Madras School of Economics, Chennai, India.

 Hegel's Science of Logic has received less attention than his Phenomenology of Spirit, but Hegel himself took it to be his highest philosophical achievement and the backbone of his system. The present book focuses on this most difficult of Hegel's published works. Béatrice Longuenesse offers a close analysis of core issues, including discussions of what Hegel means by 'dialectical logic', the role and meaning of 'contradiction' in Hegel's philosophy, and Hegel's justification for the provocative statement that 'what is real is rational, what is rational is real'. She examines both Hegel's debt and his polemical reaction to Kant, and shows in great detail how his project of a 'dialectical' logic can be understood only in light of its relation to Kant's 'transcendental' logic. This book will appeal to anyone interested in Hegel's philosophy and its influence on contemporary philosophical discussion.

Blended synchronous learning - where remote students participate in face-to-face classes by means

of rich-media synchronous technologies such as video conferencing, web conferencing and virtual worlds - is an emerging phenomenon in education. More and more teachers are attempting to teach in this challenging mode, but without any systematic research evidence to help guide their blended synchronous learning practices. The Blended Synchronous Learning Handbook is a definitive resource that addresses this issue. It includes a Blended Synchronous Learning Design Framework that offers pedagogical, technological and logistical recommendations for teachers attempting to design and implement blended synchronous learning lessons. It also includes a Rich-Media Synchronous Technology Capabilities Framework to support the selection of technologies for different types of learning activities, as well as a review of relevant literature, a summary of the Blended Synchronous Learning Scoping Study, detailed reports of seven blended synchronous learning case studies, and an in-depth cross case analysis to underpin the recommendations that are drawn.

Empire of Ecstasy offers a novel interpretation of the explosion of German body culture between the two wars: nudism and nude dancing, gymnastics and dance training, dance photography and criticism, and diverse genres of performance from solo dancing to mass movement choirs. Karl Toepfer presents this dynamic subject as a vital and historically unique construction of "modern identity," which stimulated often contradictory impulses, desires, and ambitions in participants and enthusiasts. Through the presentation and analysis of unpublished archival material (including many little-known photographs) and the reclamation of forgotten discourses of fashion, gymnastics, nudism, and the visual arts, he investigates the process of constructing an "empire" of appropriative impulses toward ecstasy. Toepfer presents the work of well-known figures such as Rudolf Laban, Mary Wigman, and Oskar Schlemmer, as well as many obscure but equally fascinating practitioners of German body culture. His book is certain to become required reading for historians of dance, body culture, and modernism.

Through an analysis of Chinese migration to Europe, this volume examines the most pressing migration and integration issues facing many societies today, from the political and policy-based challenges of managing increasingly diverse communities, to individual lived experiences of identity and belonging. In addition to chapters on the UK, France and Italy, the book spotlights one of the most extraordinary examples of Chinese migration to Europe: that provided by the city of Prato, just 20km from Florence in Tuscany, Italy. Renowned for its historic textile industry, Prato is now home to one of the largest populations of Chinese residents in Europe, a phenomenon that is remarkable not only for its magnitude but also for the speed with which it has developed. This edited collection,

which brings together twenty-seven separate contributors, deepens our understanding of the case of Prato within the context of Chinese migration to the new Europe.
