product 4. The first factor is a fraction that cannot be set equal to zero. 5. Chapter 9 Polynomials and Factoring Answer Key Basics of Algebra cover the simple operation of mathematics like addition, subtraction, multiplication, and division involving both constant as well as variables. For example, $x+10 = 0$. This introduces an important algebraic concept known as equations. The algebraic equation can be thought of as a scale where the weights are balanced through numbers or constants.
