I believe I was called to write the Lord God's truth. I was born for such reason. It has been my lifelong calling to investigate and reveal the puzzle of God's truth as revealed to me. As our world comes closer to God's predicted end-times; always know Jesus Christ, our Lord and Savior is near; even at the door. With this, it is my hope to prepare you for Satan's antichrist clone, who will come as a counterfeit. My hope is to introduce you to the real Jesus so that you will not be deceived by this coming imposter. - Dr. Joye Jeffries Pugh

Catherine and Justo Gonzalez provide a valuable resource for preaching and biblical interpretation. An account of liberation theology's impact on the task of preaching is offered by two historians of doctrine who are intimately aware of the need to be open to marginalized perspectives in the church. Early Christian preachers had much to say on issues such as the origins and proper use of wealth, the rights and duties of the poor and rich, and the nature of ownership. The Gonzalezes recapture this early Christian spirit offering concrete ways that the interpretation of specific biblical texts may be enriched or corrected in order to speak directly to the whole life of the whole church. Often used as a text in preaching courses, The Liberating Pulpit helps to clarify and to bridge the gap between those whose preaching and hermeneutics tend to be more traditional and the various minorities who tend to read Scripture in a different way.

The terms 'recombinant DNA technology', 'DNA cloning', 'molecular cloning' or 'gene cloning' all refer to the same process: the transfer of a DNA fragment of interest from one organism to a self-replicating genetic element such as a bacterial plasmid. The DNA of interest can then be propagated in a foreign host cell. This technology has been around since the 1970s, and it has become a common practice in molecular biology labs today. Reproductive cloning is a technology used to generate an animal that has the same nuclear DNA as another currently or previously existing animal. Dolly was created by reproductive cloning technology. In a process called 'somatic cell nuclear transfer' (SCNT), scientists transfer genetic material from the nucleus of a donor adult cell to an egg whose nucleus, and thus its genetic material, has been removed. The reconstructed egg containing the DNA from a donor cell must be treated with chemicals or electric current in order to stimulate cell division. Once the cloned embryo reaches a suitable stage, it is transferred to the uterus of a female host where it continues to develop until birth. Therapeutic cloning, also called "embryo cloning," is the production of human embryos for use in research. The goal of this process is not to create cloned human beings, but rather to harvest stem cells that can be used to study human development and to treat disease. Stem cells are important to biomedical researchers because they can be used to generate virtually any type of specialised cell in the human body. This new book presents an up-to-date Chronology of Cloning along with current and selected abstracts dealing with cloning as well as a guide to books on the topic. Access to the abstract and books sections is provided by title, subject and author indexes.

In his sensational novel *The Descent*, Jeff Long created a world of stunning terror and adventure, "an imaginative tour de force" (Jon Krakauer). Now he imagines a scenario so vivid, so haunting, it anchors his place among storytelling masters. YEAR ZERO An archaeological manhunt is raging in the holy land -- a hunt for the historical Jesus. For Nathan Lee Swift, a young American field researcher and expectant father, the line between noble discovery and the plunder of ruins is sacred -- until the night he crosses it. At a Roman landfill beneath the crucifixion grounds known as Golgotha, Nathan Lee yields to his professor's greed and turns common grave robber. His world -- his unborn daughter -- seems lost to him. Hundreds of miles away, on the remote Greek island of Corfu, a wealthy collector pries open his latest black-market purchase -- a fourteen-inch holy relic containing a vial of blood dating back to the first century -- and unleashes a two-thousand-year-old plague. As the pandemic explodes from the Mediterranean basin and threatens to devour humankind, Nathan Lee gets a chance at redemption. He embarks on an Odyssean journey back to the United States to find his family. Skirting the edges of the world, Nathan Lee's path finally leads him to New Mexico, where the greatest minds of science have converged at Los Alamos to find a vaccine. There Nathan Lee meets Miranda Abbot, a nineteen-year-old prodigy. As the cure continues to elude them, Miranda launches a desperate final strategy: the use of human lab rats cloned from the year zero. Nathan Lee, the thief of bones, comes face-to-face with men made from the very relics he looted, one of whom claims to be Jesus Christ, but may also be Patient Zero. Combining the scientific precision of *The Andromeda Strain* with the intensity of classic adventure epics, Jeff Long takes readers on a riveting voyage through the rubble of earthquake-torn Jerusalem, the serenity of the high Himalayas, and the eerie sanctuary of Los Alamos. With Long's characteristic originality, Year Zero races against the apocalyptic clock, creating a maze of twists, astonishing atmosphere, and the clash of science and faith.

Exalting Jesus in John is part of the Christ-Centered Exposition Commentary series. Edited by David Platt, Daniel L. Akin, and Tony Merida, this new commentary series, projected to be 48 volumes, takes a Christ-centered approach to expositing each book of the Bible. Rather than a verse-by-verse approach, the authors have crafted chapters that explain and apply key passages in their assigned Bible books. Readers will learn to see Christ in all aspects of Scripture, and they will be encouraged by the devotional nature of each exposition presented as sermons and divided into chapters that conclude with a "Reflect & Discuss" section, making this series ideal for small group study, personal devotion, and even sermon preparation. It's not academic but rather presents an easy reading, practical and friendly commentary. The author of *Exalting Jesus in John* is Matt Carter and Josh Wredberg.

It's 1999, and most of the world's computers, according to common belief, are set to regard the coming year as "Year Zero" rather than 2000. The Devil certainly appears to think so, and is planning an apocalypse of evil for New Year's Eve. Unfortunately, Molly, who's having a hard enough time just trying to stay clean and get her kids back from Social Services, becomes accidentally entangled in the Devil's scheme. Her potential allies--Elvis,

various fallen angels, little gray men, Britain's Men in Black, the masterminds of Peaslee Pharmaceuticals, and "sanity"--all prove impotent to help her out. It looks as if Molly's going to have to frustrate the Devil's plans all by herself--but it certainly won't be easy! A grand science-fantasy adventure!

Book 4 in The Jesus Thief thriller series *Sitting in meditation*, J R Lankford -globe-trotting electrical engineer turned novelist, admitted by MENSA and TOPS -entered an altered state of consciousness and experienced the seemingly impossible. Those moments became the principal inspiration for *The Covert Messiah* in which the cloned Jesus of her series returns to earth. His mission? To help humanity transition to a higher level of existence based on truths in the Bible, and in all religions, that have been ignored. To help us rediscover a secret we left behind in Tanzania 60,000 years ago. In the novels of her internationally acclaimed thriller series, J R Lankford has turned an exciting cloning plot into a complex and compelling study of cultures, philosophies and religions. Her cast of characters is both diverse and deeply human Jew, Christian, and Muslim; believers and non-believers; sinners and saints. They live and die, daring and loving and hating from the penthouses of New York, to Italy's northern lakes, to Mexico's impoverished basureros, and now to the African bush. At one of Italy's typical Saturday markets, Maggie Johnson faints when she sees her dead son, now eighteen. Could he have supernaturally returned to life? If so, what startling message has he come to deliver? Does earth's survival really depend on Biblical passages echoed in all religions that no logical modern person can believe?

FORETOLD IN THE BIBLE: Two nuclear wars. Three asteroids. Demonic madness. Into this, a savior will rise, cloned from Christ. It's not fiction. It's prophecy. The Messiah of the New Age. His coming is prophesied by more than a dozen major religions. Cloned from live cells of Jesus Christ found on the Shroud of Turin, Christopher Goodman was born into the most turbulent time in human history. Mentored by former UN Assistant Secretary-General Robert Milner, Christopher rises in position and power, and displays remarkable wisdom and compassion. But through disjointed bits of dreams that sometimes haunt him, Christopher reveals significant troubling errors in the biblical record of Jesus' life. Soon the reason for Robert Milner's interest in Christopher becomes clear: the world is about to undergo a time of destruction and chaos darker than any in history, with impending nuclear war merely a faint precursor. Milner explains that without Christopher, humanity will not long survive. Under Christopher's leadership, however, mankind stands on the threshold of a final great evolutionary leap that will bestow on the human race god-like powers. This is the reason, Milner says, that Christopher was born. In Israel, an unexpected threat to Christopher's ascension is growing: two men, possessed of incredible supernatural powers, one claiming to be the 2000-year-old Apostle John, the other an apostate Hasidic rabbi named Saul Cohen. Together, the men lead an outlawed cult of 144,000 followers, each branded with the names Yahweh and Yeshua on their foreheads. -----

In this intense and "absolutely brilliant thriller" (#1 New York Times bestselling author Brad Thor), a forensic anthropologist sets out to prove that the Shroud of Turin is a fake, but quickly discovers the opposite—and must race to stop the evil forces who want to use traces of blood in the fabric to clone Jesus Christ and bring on the second coming of their own design. Throughout his career, forensic anthropologist and outspoken atheist Dr. Jon Bondurant has investigated many religious artifacts said to be real, but he knows better. Only weak minds rely on such obviously false relics to maintain their silly, pointless faith. So when he is invited by the Vatican to examine the Shroud of Turin, said to be the burial cloth that covered the

body of Christ—and the most revered of all Christian artifacts—he is delighted for the opportunity to prove once and for all that the Shroud is a fake. But when he meets Domenika Josef, the beautiful and devout Vatican representative who finds him arrogant and self-important, he realizes his task will not be as straightforward as he once imagined. Domenika believes that the relic is real, and wants nothing more than to rescue the tarnished reputation of the church by announcing the good news. As Bondurant and his team examine every element of the Shroud, he and Domenika begin to

see each other in a whole new light. And as the evidence about the origin of this highly contested piece of fabric starts to pile up, he begins to realize that he's been seeing a lot of things incorrectly. But when a sample of the blood from the Shroud—believed to be the real blood of Jesus Christ—vanishes, he realizes his problems are just beginning. The DNA in that sample could have earth-shattering consequences if it falls into the wrong hands. When Domenika vanishes too, Bondurant is caught in a globe-spanning chase to rescue the woman he loves—and stop the evil forces who have their own motives for bringing on the Second Coming.
