Story Behind the Book "After speaking on The Wounded Woman , some guys asked me, 'What about us?' I was taken aback and asked, 'What do you mean?' 'Life is hard,' one of them said. 'People are cruel. As guys, we get beat up, and nobody addresses our wounds. Help us deal with the pain of getting shot down.' Over the next month, I couldn't get this conversation out of my mind. Every day I ran into some wounded warrior: a father facing the death of his son, a husband stunned by the unfaithfulness of his wife, a brother betrayed by a brother. Finally, I recognized I had to write something to encourage us guys."—Dr. Steve Stephens

The content of Human Performance Optimization is unique in terms of the focus, breadth, and scope of the individual chapter contributions. Moreover, this book was developed in response to a pressing need, first directed by the Chief of Staff of the Army, to examine current and future developments in behavioral, cognitive, and social neuroscience that may allow organizations to enhance individual worker and team performance. This volume captures a wide range of approaches, both with an eye to describing state of the art knowledge, and projecting what may become applicable in the near future. The variety of social, technological, and scientific issues make this book indispensable in our time. Organizations of all sorts, but especially those who operate in "in extremis" or high-stakes settings, are seeking to improve the performance of their workers. The chapters' breadth and accessibility will allow strategic leaders of organizations to evaluate breaking news in HPO, and will also serve as an up-to-date review of the field for scientists involved in human performance research.
