These reports are the result of a collection of statistics of marriage and divorce for the years 1922- They represent the fourth- investigation on the subject made by the federal government. The first investigation, made by the former Department of Labor, covered the 20-year period 1867-1886; the second investigation made by the Bureau of the Census, covered the 20-year period 1887-1906; and the third investigation, also made by the Bureau of the Census, covered the calendar year 1916 cf. 1922, Letter of transmittal, p. ii.

The Poems of François Villon Lulu.com

One of the most original and influential European poets of the Middle Ages, François Villon took his inspiration from the streets, taverns, and jails of Paris. Villon was a subversive voice speaking from the margins of society. He wrote about love and sex, money trouble, "the thieving rich," and the consolations of good food and wine. His work is striking in its directness, wit, and gritty urban realism. Villon's writing spurred the development of the psychologically complex first-person voice in lyric poetry. He has influenced generations of avant-garde poets and artists. Arthur Rimbaud and Paul Verlaine have emulated Villon's poetry. Claude Debussy set it to music, and Bertolt Brecht adapted it for the stage. Ezra Pound championed Villon's poetry and became largely responsible for its impact on modern verse. With David Georgi's ingenious translation, English-speaking audiences finally

have a text that captures the riotous energy and wordplay of the original. With a newly revised French text that reflects the latest scholarship, this bilingual edition also features inviting and informative notes that illuminate the nuances of Villon's poems and the world of medieval Paris.

This book is one of the first to use citizenship as a lens through which to understand German history in the twentieth century. By considering how Germans defined themselves and others, the book explores how nationality and citizenship rights were constructed, and how Germans defined—and contested—their national community over the century. The volume presents new research informed by cultural, political, legal, and institutional history to obtain a fresh understanding of German history in a century marked by traumatic historical ruptures. By investigating a concept that has been widely discussed in the social sciences, Citizenship and National Identity in Twentieth-Century Germany engages with scholarly debates in sociology, anthropology, and political science.

Madame de Souza was an eighteenth-century political journalist of undisputed talent. She did not fear to accuse religion of falsely justifying intolerant political attitudes, or using indoctrination for little human gain. She dared to show that this achieved immediate social dislocation, and, in the long-term, grief and financial dysfunction. Eugénie et Mathilde, which documents revolutionary decisions made in Emigration, and the irrevocable futility of losing family, home, rank and property in war, fully reflects her approach. It is a complex and compelling story of one family and its experience of 1789-1797 - the years of exile during the French Revolution. Heart-rending decisions, forced departures, capital punishment and death of loved-ones make the novel as topical now as it was on the eve of Napoleon's Russian Campaign. Souza's plea for tolerance, fraternity and compromise on the part of the State and its enemies has a relevance that stretches out to the 21st Century; her message to include women in politics and not to make them suffer the unnecessary death of fathers, husbands, children and friends is even more current. This edition lifts the veil on a literary form of anti-sentimental romance, or the art of making historically accurate accounts masquerade as fiction. That, more than anything else, was Madame de Souza's forte.

In this introduction to commutative algebra, the author chooses a route that leads the reader through the essential ideas, without getting embroiled in technicalities. He takes the reader quickly to the fundamentals of complex projective geometry, requiring only a basic knowledge of linear and multilinear algebra and some elementary group theory. The author divides the book into three

parts. In the first, he develops the general theory of noetherian rings and modules. He includes a certain amount of homological algebra, and he emphasizes rings and modules of fractions as preparation for working with sheaves. In the second part, he discusses polynomial rings in several variables with coefficients in the field of complex numbers. After Noether's normalization lemma and Hilbert's Nullstellensatz, the author introduces affine complex schemes and their morphisms; he then proves Zariski's main theorem and Chevalley's semi-continuity theorem. Finally, the author's detailed study of Weil and Cartier divisors provides a solid background for modern intersection theory. This is an excellent textbook for those who seek an efficient and rapid introduction to the geometric applications of commutative algebra.

Madeleine de l'Aubespine (1546-1596), the toast of courtly and literary circles in sixteenth-century Paris, penned beautiful love poems to famous women of her day. The well-connected daughter and wife of prominent French secretaries of state, l'Aubespine was celebrated by her male peers for her erotic lyricism and scathingly original voice. Rather than adopt the conventional self-effacement that defined female poets of the time, l'Aubespine's speakers are sexual, dominant, and defiant; and her subjects are women who are able to manipulate, rebuke, and even humiliate men. Unavailable in English until now and only recently identified from scattered and sometimes misattributed sources, l'Aubespine's poems and literary works are presented here in Anna Klosowska's vibrant translation. This

collection, which features one of the first French lesbian sonnets as well as reproductions of l'Aubespine's poetic translations of Ovid and Ariosto, will be heralded by students and scholars in literature, history, and women's studies as an important addition to the Renaissance canon.
