"This publication provides an inventory of United Nations jurisprudence relevant to electoral processes. It organizes and cross-references international law applicable to elections in order to make it accessible to national and international stakeholders. The Guidelines aspire to near-global

applicability and focuses explicitly on national accountability and ownership, an essential tool for EMBs and national stakeholders engaged in electoral reforms. The focus on UN treaty obligations is meant to promote consistency, objectivity, impartiality, accuracy and professionalism in drafting and reviewing legal frameworks for elections. The Guidelines include tables of jurisprudence and checklists which facilitate review of how far national legal frameworks comply with UN treaty provisions and jurisprudence on elections."--

Citizenship as Foundation of Rights explores the nature and meaning of American citizenship and the rights flowing from citizenship in the context of current debates around politics, including immigration. The book explains the sources of citizenship rights in the Constitution and focuses on three key citizenship rights - the right to vote, the right to employment, and the right to travel in the US. It explains why those rights are fundamental and how national identification systems and ID requirements to vote, work and travel undermine the fundamental citizen rights. Richard Sobel analyzes how protecting citizens' rights preserves them for future generations of citizens and

aspiring citizens here. No other book offers such a clarification of fundamental citizen rights and explains how ID schemes contradict and undermine the constitutional rights of American citizenship.

The role of women in India has changed significantly over the past few years. Globalization, urbanization, industrialization and privatization all played an important role in this development. After India became independent, several provisions for women were added to the Constitution of India, which is now one of the most rights-based constitutions in the world. Drafted around the same time as the Universal Declaration of Human Rights- UNO (1948), the Indian Constitution captures the essence of human rights in its Preamble, and elaborates these rights further in the sections on Fundamental Rights and on the Directive Principles of State Policy. The protection of women's rights and the enhancement of their social and economic possibilities have become important political issues. Due to these socio-political changes, women have already gotten the opportunity to take important offices in India, including that of president, prime minister, speaker of the Lok Sabha and leader of the opposition. With the 73rd Constitutional Amendment Act from 1992 and the 74th Constitutional Amendment Act from 1993, women are furthermore empowered in local level government bodies. Apart from the political changes, women in India now also participate in all social activities and take part in sports, media, art and culture, science and technology. This book takes a look at every aspect of a woman's life, such as education, marriage, family and health, in order to give a thorough and accurate account of the role of women in today's India.

A credible voter register gives legitimacy to the electoral process and helps prevent electoral fraud. However, voter registration remains a complex and contested task. It is one of the most important activities that an electoral management body needs to conduct, but it is also one of the most costly in terms of both time and resources. Many countries that face challenges in creating an accurate voter register are considering reforming their voter registration systems through the introduction of biometric technologies. The drive towards biometrics has been facilitated by its largely apolitical nature. Investing in high-tech solutions allows stakeholders to demonstrate their commitment to resolving electoral problems. At the same time, expectations on biometric solutions may be exaggerated. This guide provides an overview of key concepts and considerations for all stakeholders involved in discussions about the application of biometrics in elections, both for voter registration before an election and for voter verification at polling stations on election day.

The September 2014 elections in Fiji was one of the most anticipated in the history of the country, coming after eight years of military rule and under a radically new constitution that introduced a system of proportional representative (PR) and without any reserved communal seats. The election was won overwhelmingly by FijiFirst, a party formed by 2006 coup leader Frank Bainimarama. He subsequently embarked on a process of shifting the political configuration of Fijian politics from inter-ethnic to trans-ethnic mobilisation. The shift has not been easy in terms of changing people's perceptions and may face some challenges in the longer term, despite Bainimarama's clear victory in the polls. Ethnic consciousness has the capacity to become re-articulated in different forms and to seek new opportunities for expression. This book explores these and other issues surrounding the 2014 Fiji elections in a collection of articles written from varied political, intellectual and ideological positions.

This book looks at the patterns and trends of participation in Indian elections since 1952 – the first elections held in independent India. It engages with debates around the nature of the multi-party electoral politics in India and its impact on the voting behaviour of Indian voters. The book uses extensive empirical data from the state and national elections to analyze the history and evolution of the country's electoral systems as well as the challenges and safeguards for conducting fair elections in the world's largest democracy. The author explores the trends in turnout in regional and national elections and its relationship with electoral outcomes. He analyzes electoral patterns over the last seven decades as well as patterns of participation of marginalized groups, the younger population, and the narrowing gap of women's electoral participation. The book discusses the role of money, the criminalization of electoral politics, and its influence on Indian elections. It also focuses on the issue of irregular delimitation of electoral constituencies and its implication on political representation. Topical and comprehensive, this book will be an essential read for scholars and researchers of political studies, political sociology, public administration and governance, and South Asian studies. It will also be useful for journalists and think tanks interested in India's electoral processes and debates. It could serve as a guidebook as well for those interested in the nitty-gritty of Indian elections.

Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 193 countries and a group of select territories are used by policy makers, the media, international corporations, and civic activists and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide. Press accounts of the survey findings appear in hundreds of influential newspapers in the United States and abroad and form the basis of numerous radio and television reports. The Freedom in the World political rights and civil liberties ratings are determined through a multi-layered process of research and evaluation by a team of regional analysts and eminent scholars. The analysts used a broad range of sources of information, including foreign and domestic news reports, academic studies, nongovernmental organizations, think tanks, individual professional contacts, and visits to the region, in conducting their research. The methodology of the survey is derived in large measure from the Universal Declaration of Human Rights, and these standards are applied to all countries and territories, irrespective of geographical location, ethnic or religious composition, or level of economic development.
