These proceedings represent the work of researchers presenting at the 16th European Conference on Knowledge Management (ECKM 2015). We are delighted to be hosting ECKM at the University of Udine, Italy on the 3-4 September 2015. The conference will be opened with a keynote from Dr Madelyn Blair from Pelerei Inc., USA on the topic "The Role of KM in Building Resilience". On the afternoon of the first day Dr Daniela

Santarelli, from Lundbeck, Italy will deliver a second keynote speech. The second day will be opened by Dr John Dumay from Macquarie University, Sydney, Australia. ECKM is an established platform for academics concerned with current research and for those from the wider community involved in Knowledge Management to present their findings and ideas to peers from the KM and associated fields. ECKM is also a valuable opportunity for face to face interaction with colleagues from similar areas of interests. The conference has a well-established history

of helping attendees advance their understanding of how people, organisations, regions and even countries generate and exploit knowledge to achieve a competitive advantage, and drive their innovations forward. The range of issues and mix of approaches followed will ensure an interesting two days. 260 abstracts were initially received for this conference. However, the academic rigor of ECKM means that, after the double blind peer review process there are 102 academic papers, 15 PhD research papers, 1 Masters research papers and 7 Work in Progress papers published in these Conference Proceedings. This book is open access under a CC BY

Presenting rigorous and original research, this volume offers key insights into the historical, cultural, social, economic and political forces at play in the creation of world-class ICT innovations in Kenya. Following the arrival of fiber-optic cables in 2009, Digital Kenya examines why the initial entrepreneurial spirit and digital revolution has begun to falter despite support from motivated entrepreneurs, international investors, policy experts and others. Written by engaged scholars and professionals in the field, the book offers 15 eye-opening chapters and 14 one-on-one conversations with entrepreneurs and investors to ask why establishing ICT start-ups on a continental and global scale remains a challenge on the “Silicon Savannah”. The authors present evidence-based recommendations to help Kenya to continue producing globally impactful ICT innovations that improve the lives of those still waiting on the side-lines, and to inspire other nations to do the same.

Jenga Commonwealth Secretariat This handbook provides a global overview of the design, implementation and assessment of academic development centers within higher education institutions. The current nature of our complex, rapidly changing world makes it imperative that colleges and universities worldwide find ways to educate their students in new and better ways: this is reflected in a change in focus from teaching and testing to maximizing

student learning in line with the core mission of ADCs to ensure students achieve the best possible learning outcomes. This handbook builds on this transformation, as well as the foundational ADC structure and programming guidelines established by the Professional and Organizational Development Network, to offer a comprehensive exploration of professional development in the sector. This handbook is global in scale and comprehensive in scope, addressing various key topics such as organizational structure and leadership, funding, and program design. It calls for professors and academics to reflect on and adapt their methods of teaching independent to their research, and provides helpful frameworks and case studies for researchers designing centers or seeking models for additional programs.

Faculty Personnel Bernan Press(PA) Today, the demands of citizens and governments on the modern company are for it to play a very broad role in the development of society, and be a partner in building a fairer, more stable and sustainable world. Through philanthropic and corporate citizenship activities,

businesses are already making significant contributions in a range of areas, including those on education, health, the environment and water provision. Good corporate citizenship can also contribute significantly to the wider goals of sustainable development, including the Millennium Development Goals. As the Commonwealth Business Council has demonstrated in its publication, *Corporate Citizenship in Action: Learning from Commonwealth Experience* (2003), there is a growing body of experience to draw on and learn from.
