This tool is essential for anyone entering an MBA program. The MBA Survival Kit is a series

of programs brought to you by the Graduate Management Admission Council and McGraw Hill/Irwin. This four CD program provides an introduction to Finance, Accounting, Quantitative Skills and Statistics topics and is designed as a review for those entering an MBA program. On average each CD contains 16-20 hours of self-directed learning that explores core quantitative skills used across functional business areas within distinctly different companies, with the user assuming the role of a consultant. The programs guide the student through two key areas of learning that reinforce student skill building using video, animation and consistent feedback.

The training area provides a topic overview, animations and practice for that topic. The office area contains client cases. The user, in the role of a business consultant, works through cases in a virtual office setting, to reinforce the skills learned in the training area.

This book provides practical guidance and strategies to help students make a successful transition to university and unlock their academic potential. Chapters are organised around five essential skills for success: time management, academic reading, academic writing and group-work, all of which are underpinned by independent

learning. Students will learn how to demonstrate critical analysis in their writing, overcome challenges in group projects and deliver presentations with confidence and focus. In bringing together academic and employability skills, readers are encouraged to make connections between the skills they have developed inside and outside the classroom and to start the process of personal development planning sooner rather than later. Packed with activities, 'pause for thought' reflective tasks, student insights and model assignments, Skills for Business and Management is an essential resource for undergraduates and

postgraduates on any business and management course. It is also ideal for those studying relating fields, such as accounting, finance, human resource management, hospitality, marketing and tourism management.

In *The Dean's List*, Matthew A. Waller provides a roadmap for anyone who leads or aspires to lead a business college. Waller, dean of the Sam M. Walton College of Business at the University of Arkansas since 2015, offers a variety of practical tools and insights for leading effectively and confidently in the challenging, ever-evolving landscape of collegiate administration. Waller provides a field-tested framework for leadership as he explores twelve areas that are critical for leading a successful

business college, including institutionalizing innovation, operating as the communicator in chief, managing the college's finances, and delivering appreciation. The role of a dean has changed dramatically in the last few decades. In addition to managing up, down, and sideways while dealing with students, staff, and faculty, there's a growing demand for deans to work with parents, alumni, and donors as well as business and community leaders. The Dean's List highlights examples from Waller's career to illustrate practical advice for dealing with the specific challenges deans regularly face. The result is a handbook for shortening the learning

curve for anyone who is, or aspires to be, the dean of a business college.
