NIDAROS - the Jerusalem of the North - was a very important pilgrimage destination for centuries - until the Reformation. For some years now, pilgrims again are making their way along St. Olav Ways to Nidaros Cathedral in Trondheim in Norway. In his third pilgrimage book about the Ways of St. Olav, Michael Schildmann describes his experiences on this very special Scandinavian track: from Karlstad in Sweden via Inbygda to Nidaros Cathedral. After his successful German trilogy of the Ways of St. Olav, here you find the thought-provoking diary and guide to a pilgrimage route that not many people have found by now. - Schildmann made his first pilgrimage in 2007 on the Way of St. James from Somport Pass to Santiago de Compostela and Muxia.

World Agriculture Carol Harris Weber

This volume collects novel contributions to comparative generative linguistics that "rethink" existing approaches to an extensive range of phenomena, domains, and architectural questions in linguistic theory. At the heart of the contributions is the tension between descriptive and explanatory adequacy which has long animated generative linguistics and which continues to grow thanks to the increasing amount and diversity of data available to us. The chapters develop novel insights into a number of core syntactic phenomena, such as the structure of and variation in diathesis, alignment types, case and agreement splits, and the syntax of null elements. Many of these contributions show the influence of research by Ian Roberts and collaborators and they provide varied perspectives on current research in synchronic and diachronic comparative syntax.

Although the years from 1873-1893 lacked the well known, dramatic events of the periods before and after, this period presented a major transformation in Wisconsin's economy. The third volume in the History of Wisconsin series presents a balanced, comprehensive, and witty account of these two decades of dynamic growth and change in Wisconsin society, business, and industry. Concentrating on three major areas: the economy, communities, and politics and government, this volume in the History of Wisconsin series adds substantially to our knowledge and understanding of this crucial, but generally little-understood, period.

While the campaign in Norway from April to June 1940 was a depressing opening to active hostilities between Britain and Nazi Germany, it led directly to Churchill's war leadership and The Coalition. Both were to prove decisive in the long term.??This well researched work opens with a summary of the issues and personalities in British politics in the 1930s. The consequences of appeasement and failure to re-arm quickly became apparent in April 1940. The Royal Navy, which had been the defence priority, found itself seriously threatened by the Luftwaffe's control of the skies. The economies inflicted on the Army were all too obvious when faced by the Wehrmacht. Losses of men and equipment were serious and salutary.??As the Author describes, the campaign itself was fought in three phases: the landings in support of the Norwegians, the evacuation from Central Norway which led to Chamberlain's resignation and, finally, the campaign in the North which remained credible until the fall of France. At the same time he covers the political background and activity in London and cabinet in-fighting.??The Norway Campaign and the Rise of Churchill 1940, with its informed mix of politics and war fighting, provides a well informed and balanced overview of the opening campaign of the Second World War and its immediate and wider consequences.??As featured in the Dover Express, Folkestone Herald and Essence Magazine.

The project "Religious Education at Schools in Europe" (REL-EDU), which is divided up into six volumes (Central Europe, Western Europe, Northern Europe, Southern Europe, South-Eastern Europe, Eastern Europe), aims to research the situation with regard to religious education in Europe. The third volume outlines the organisational form of religious education in the countries of Northern Europe (Denmark, Sweden, Finland, Norway, Estonia, Lithuania, Latvia, Iceland). This is done on the basis of thirteen key issues, which allows specific points of comparison between different countries in Europe. Thereby the volume focusses the comparative approach and facilitates further research into specific aspects of the comparison.

Emerging in the throes of a global pandemic that threatens Europe's economies and food security, International Labour Migration to Europe's Rural Regions combines a diverse range of empirically rich, in-depth case studies, analysis of their rural context specificities, and insights from labour market and migration theories, to critically examine the conditions and implications of rural labour

migration. Despite its growing political, economic and social importance, our understanding of international labour migration to Europe's rural regions remains limited. This edited volume provides intricate descriptions of lived experience, critical theoretical analyses, analytical synthesis, and policy recommendations for this novel and developing phenomenon that has the potential to transform the lives of international migrants and local communities. The book's 25 authors represent a wide range of social science disciplines, with coverage of a vast range of Europe's rural regions, and diverse types of rural labour in areas such as horticulture, shepherding, wild berry picking and fish processing. The volume will be of interest to policy makers at local, regional, national and European levels, and scholars and students in a broad range of areas, including migration, labour markets, and rural studies.

St. Olav Ways III- The Østerdalsleden Path

This book explores the practical and symbolic resources of legitimacy which the elites of medieval Scandinavia employed to establish, justify, and reproduce their social and political standing between the end of the Viking Age and the rise of kingdoms in the thirteenth century. Geographically the chapters cover the Scandinavian realms and Free State Iceland. Thematically the authors cover a wide palette of cultural practices and historical sources: hagiography, historiography, spaces and palaces, literature, and international connections, which rulers, magnates or ecclesiastics used to compete for status and to reserve haloing glory for themselves. The volume is divided in three sections. The first looks at the sacral, legal, and acclamatory means through which privilege was conferred onto kings and ruling families. Section Two explores the spaces such as aristocratic halls, palaces, churches in which the social elevation of elites took place. Section Three explores the traditional and novel means of domestic distinction and international cultural capital which different orders of elites - knights, powerful clerics, ruling families etc. - wrought to assure their dominance and set themselves apart vis-à-vis their peers and subjects. A concluding chapter discusses how the use of symbolic capital in the North compared to wider European contexts.
