The edited, annotated diary of President Jimmy Carter--filled with insights into his presidency, his relationships with friends and foes, and his lasting impact on issues that still preoccupy America and the world Each day during his presidency, Jimmy Carter made several entries in a private diary, recording his thoughts, impressions, delights, and frustrations. He offered unvarnished assessments of cabinet members, congressmen, and foreign leaders; he narrated the progress of secret negotiations such as those that led to the Camp David Accords. When his four-year term came to an end in early 1981, the diary amounted to

more than five thousand pages. But this extraordinary document has never been made public--until now. By carefully selecting the most illuminating and relevant entries, Carter has provided us with an astonishingly intimate view of his presidency. Day by day, we see his forceful advocacy for nuclear containment, sustainable energy, human rights, and peace in the Middle East. We witness his interactions with such complex personalities as Ted Kennedy, Henry Kissinger, Joe Biden, Anwar Sadat, and Menachem Begin. We get the inside story of his so-called "malaise speech," his bruising battle for the 1980 Democratic nomination, and the

Iranian hostage crisis. Remarkably, we also get Carter's retrospective comments on these topics and more: thirty years after the fact, he has annotated the diary with his candid reflections on the people and events that shaped his presidency, and on the many lessons learned. Carter is now widely seen as one of the truly wise men of our time. Offering an unprecedented look at both the man and his tenure, *White House Diary* is a fascinating book that stands as a unique contribution to the history of the American presidency. Mutual Representations in the Modern Era Alfred Publishing Company In the aftermath of an armed conflict in

Africa, the international community both produces and demands from local partners a variety of blueprints for reconstructing state and society. The aim is to re-formalize the state after what is viewed as a period of fragmentation. In reality, African economies and politics are very much informal in character, with informal actors, including so-called Big Men, often using their positions in the formal structure as a means to reach their own goals. Through a variety of in-depth case studies, including the DRC, Sierra Leone and Liberia, this comprehensive volume shows how important informal political and economic networks are in many of the continent's conflict

areas. Moreover, it demonstrates that without a proper understanding of the impact of these networks, attempts to formalize African states, particularly those emerging from wars, will be in vain. Primitivo Department of Transportation Federal Aviation This book is about the close historical and linguistic relationship between the languages of Surinam and Benin, a relationship which can be viewed in terms of a Trans Atlantic Sprachbund or linguistic area. It consists of a detailed analysis of various possible substrate and adstrate effects in a number of components of the grammar, in the Surinam Creole languages, primarily from the Gbe

languages of Benin but also from Kikongo.

Big Men and Networks

Synthesizes several expeditions by archeologists connected with Amsterdam's Rijksmuseum in the Novaya Zemlya archipelago between 1991 and 2000 and their historical parallels of four centuries.

The Future of Naval Aviation Oxford

University Press, USA
The Navy Yeoman (YN) is an administrative related field and is normally assigned to an administrative office. In today's Navy, the YN carries out a broad range of duties which include office procedures, typing correspondence such as official letters, instructions, notices, plan of the day, fitness and evaluation forms and forms

management programs, mail management, security, legal, awards, and records disposal. YN also must demonstrate a working knowledge of pay and allowances, leave procedures, along with maintaining officer and enlisted service records, officer promotions and enlisted advancements. YN must understand the following programs: the officer distribution control report (ODCR) and enlisted distribution verification report (EDVR), casualty assistance calls officer (CACO), social usage and protocol, travel, navy standard integrated personnel system (NSIPS), and individual personnel tempo (ITEMPO). YN also need to have an understanding of

working with flag offices.

Africa's Oil Boom and the Poor Wordsmith Pub

Today, alongside its all-important operations in direct support of the Global War on Terrorism, naval aviation also continues its now 60-year commitment to shaping the maritime and littoral environment through persistent forward presence. In the longer term, naval aviation is also adapting to a series of geopolitical revolutions which will dramatically increase the future demand for a secure sea base capable of projecting dominant power ashore in wartime against the full spectrum of possible opponents. It is adapting to these

demands by exploiting technologies and operational practices developed in the last decade that will greatly increase its ability to surge and concentrate forces rapidly; protect the sea base from new air, surface, and undersea threats; and find, identify, locate, track, and strike mobile as well as fixed targets ashore, under all weather conditions, and in timely enough fashion to produce the desired effects. This report discusses the following topics: (1) Formal Alliances Provide Predictable Access, Informal Coalitions Do Not; (2) Distributed Ground Forces Require Persistent, Distributed Air Support; (3) The Sea Shield Must Be Dominant If the Sea Base Is to Be Effective;

(4) Adapting; (5) The Spectrum from Presence to Major Combat; (6) Technology and the Spectrum of Threat; (7) The Value of Robust Airborne Early Warning (AEW) Aircraft; (8) No Substitute for Range in Carrier Aviation; (9) The Need for Airborne Electronic Attack (AEA) is Not Going Away; (10) Land-Based Maritime Patrol Aircraft; (11) Multimission Helicopters; (12) New Capabilities and Challenges; (13) Eliminating the Weather Sanctuary for Mobile Targets; (14) Providing a Dominant Defense of the Sea Base; (15) Shoot Archers Not Arrows; (16) Make Opposing Submarines Pay for Their Inevitable Indiscretions; (17) Get Back in the Counter-

Surveillance Business; and (18) The Force of the Future.

The new African oil boom centered on the oil-rich Atlantic waters of the Gulf of Guinea, from Nigeria to Angolais a moment of great opportunity and great peril for countries

beset by wide-scale poverty.

The Estimate of the Situation U. S. National Aeronautics & Space Administration

This volume ties together the histories of Japan and China for the modern period prior to the 20th century. The chapters look at Chinese and Japanese works which were written in response to events in the other country. None of these works has received any sustained attention in the west. As a result we get a view of how Chinese and Japanese saw each other at a time when there were few personal contacts allowed. Many of these texts were built on fanciful embellishments of stories that migrated from one land to the

other. But the unique qualities of the Sino-Japanese cultural bond seem to have conditioned the interaction so that these texts all reveal a fascinatingly well-defined area.

The Evolution of the Cruise Missile
University of Arizona Press

Environmental information is important for successful planning and execution of naval operations. A thorough understanding of environmental variability greatly increases the likelihood of mission success. To ensure that naval forces have the most up-to-date capabilities, the Office of Naval Research (ONR) has an extensive environmental research program. This

research, to be of greatest use to the warfighter, needs to be directed towards assisting and solving battlefield problems. To increase research community understanding of the operational demands placed on naval operators and to facilitate discussion between these two groups, the National Research Council's (NRC) Ocean Studies Board (OSB), working with ONR and the Office of the Oceanographer of the Navy, convened five previous symposia on tactical oceanography. Oceanography and Mine Warfare examines the following issues: (1) how environmental data are used in current mine warfare doctrine, (2) current procedures for in situ

collection of data, (3) the present capabilities of the Navy's oceanographic community to provide supporting information for mine warfare operations, and (4) the ability of oceanographic research and technology developments to enhance current mine warfare capabilities. This report primarily concentrates on the importance of oceanographic data for mine countermeasures. The War Within JaapJan Zeeberg Incorporating an extensive range of materials, including the personal experiences of many people who lived through the Stalinist years, Medvedev, a dissident Soviet historian,

reassesses Stalin's character and actions in a withering indictment of the Stal

William E. DePuy was
likely the most
important figure in the
recovery of the United
States Army from its
collapse after the
defeat in Vietnam. That
is a rather large claim,
and it suggests a
precedence over a
number of other

distinguished officers, both his contemporaries and successors. But it is a claim that can be justified by the test of the “null hypothesis:” Could the Army that conducted the Gulf War be imagined without the actions of General DePuy and those he instructed and inspired? Clearly, it could not. There are a few officers of the period about whom one can make the same claim. To judge properly the accomplishments of General DePuy and his talented subordinates at the US Army Training and Doctrine Command (TRADOC), one must understand the sense of crises and defeat that pervaded the Army in the 1970s. By 1973, the United States had lost the war

in Vietnam. Only the most optimistic or naïve observer held out hope that the Geneva Accords would provide security for the Republic of South Vietnam. The US Army was in a shambles, with discipline destroyed and the chain of command almost nonexistent. The “All Volunteer Army” was borne on a wave of permissiveness that compounded the problems of restoring discipline. Moreover, the army was ten years behind its most likely enemy in equipment development, and it had no warfighting doctrine worthy of the same. With the able assistance of the commander of the Armor Center, General Donn Starry, General DePuy wrenched the

Army from self-pity and recrimination about its defeat in Vietnam into a bruising doctrinal debate that focused the Army's intellectual energies on mechanized warfare against a first-class opponent. Critics might argue correctly that that the result was incomplete, but they out not to underestimate how far the Army had to come just to begin the discussion. General DePuy also changed the way Army battalions prepared for war. He made the US Army a doctrinal force for the first time in history. Aply seconded by General Paul Gorman, DePuy led the Army into the age of the Army Training and Evaluation Program (ARTEP). The intellectual and

training initiatives were joined then, with a third concern of General DePuy's TRADOC: the development of a set of equipment requirements, with a concentration of effort on a limited number, ultimately called the "Big Five." The result was the suite of weapons that overmatched the Iraqis in Operation Desert Storm - Apache attack helicopters, M1 tanks, Bradley fighting vehicles, Patriot air defense missiles, and Black Hawk assault helicopters. General DePuy championed the recruitment of a high-quality soldiery, an effort beyond his own significant responsibilities but, even so, one he never ceased to support and forward.
